

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

1868.

PRAEFATIO.

Pauca sunt quae huic supplemento tertio Monographiae Heliceorum praemittam, Lectori benevolo praesertim in mentem vocans, cui fini opus meum inservire destinatum sit, nempe praebere « methodum conchologicam, inveniendis et determinandis speciebus incognitis vel dubiis, quantum fieri poterat, adaptatam ». (Praef. vol. IV.) Methodum magis scientificam et animalium structuram internam respicientem, pro opere meo lubenter adoptarem, sed jam pluries et recentissime, cum de editione Martensiana systematis Albersiani dissererem (Malak. Bl. 1867. p. 1. 80 et 227), rationes fusius exposui, e quibus tali progressui renuntiare coactus fui. Attamen omnibus speciebus locum suum in systemate laudato exacte adscripsi, et quidem brevitatis causa ea forma, ut e. g. « A². 22 » significet: « *Albers Helic. ed. sec., cur. v. Martens p. 22* ».

Genera nonnulla in Monographia antea ommissa nunc recepi, quia in omnibus collectionibus conchologicis admitti solent, exclusis tamen illis testis non spiratis, quae deficientibus characteribus specificis solum ex animalis natura dignosci possunt (ut *Limax*, *Arion*, *Parmacella*, etc.). — Praeterea nova nonnulla genera recentioribus temporibus pro typis novis bene constituta sunt, aliaque admisi ab Auctoribus melius quam

antea circumscripta, quo species inter genera Lamarckiana ambiguas connexionione naturali aptius jungerem.

Distributio specierum in singulis generibus fere eadem est ac in Monogr. vol. IV, et post numerum currentem speciei cujusvis numerum (minorem) inclusi, quo, si adest, in volumine quarto notata est. Numeri post localitatem inclusi Monographiae volumen et paginam indicant, quibus descriptio originaria vel emendata specierum invenitur.

Cassellae, mense Decembri 1867.

L. Pfeiffer, Dr.

HELICEORUM VIVENTIU

SERIES AUCTIONATA ET EMENDATA.

I. Testacella Cuvier.

Testa externa, non oblecta, haliotide, solida, imperforata, vertice subspirali; apertura permagna, intus submargaritacea.

Animal repens, limaciforme, carnivorum. Maxilla nulla. Dentes radulae aequales, spiniformes, hamati. — Collum elongatum, sulcis 2 lateralibus exaratum. Pallium plerumque simplex.

Testacella Cuvier 1800. Anat. comp. I. tabl. 5; 1804. Ann. Mus. V. p. 435. t. 29: novum genus Molluscorum.

— Lamarck 1801. Syst. p. 96: genus Unilocularium spirivalvium.

Genus characteribus anatomicis, inprimis maxillae defectu et dentium lingualium indole *Daudebardiae* et *Oleacinae* proximum, et a recentioribus in una familia cum his insertum. Genus *Plectrophorus* **Fér.**, a **Cl. Gray** familiae *Testacellinorum* adscriptum, hucusque omnino dubium remansit, a nemine ulterius observatum, quare a recentioribus omissum. — *Testacellae* generis historiam optime exposuerunt **Gassies** et **Fischer** in *Monographia* supra citata; vivendi rationem descripsit **Albers** secundum observationes proprias in insula Madera, de sacco buccali scripsit **Cantraine** (*Malac. médit.* p. 97), de sacculis auditoriis **Laurent** (1838. *Ann. d'anat.* p. 242), de oculis **Lespés** (1851. *Sur l'oeil des moll.*), de lingua **Moquin-Tandon** etc.

Species notae characteribus animalium ipsorum potius quam testarum distinguendae, attamen in libro meo testas modo in reliquis generibus tractante characteres physiologicos et anatomicos praetermittere coactus sum, quippe qui praesertim in *Monographia* egregia dominorum **Fischer** et **Gassies** optime dilucidati sunt.

In describendis testis Auctorum *Monographiae* descriptiones gallice confectas lingua latina exacte reddidi, vel **Cl. Dupuyi** phrases latinas adoptavi. Comparationis causa in hoc genere, paucas species continente, fossiles praetermittere nolui.

A. Testa convexa.

1. *T. Mangel Férussac.*

• *T.* epidermide vestita, majuscula, ovali-oblonga, marginibus fere parallelis, antice subdilatata, superne convexa, basi concava; striae incrementi juniorum subtiles, adultarum rugosae et elevatae. Testa virescens vel brunnescens, nitida, saepius, praesertim ad verticem, erosa. Apertura ovali-oblonga, antice rotundata, postice obtuse angulata; margo columellaris reflexus, incrassatus, superne sulculum formans. Columella lata, callosa, antice acuminata, non truncata, leviter inflexa, margo dexter curvatus, tenuis, membranaceus, versus medium subflexuosus, ad junctionem cum columella sulculum distinctum formans.

Anfractus 2, primus acuminatus, supra suturam carinatum vix involutus. — Long. 13—17, lat. 7—11, alt. $3\frac{1}{2}$ — $5\frac{1}{2}$ mill. » (G. et F. — Coll. Nr. 1 cum anim.).

T. imperforata, depressissima, ambitu ovalis, solidula, striis incrementi distinctis et lineis impressis radiantibus sculpta, fulva; spira minima, $\frac{1}{8}$ longitudinis occupans; anfr. $2\frac{1}{2}$, ultimus latere subcompressus; columella superne crasse callosa; apertura oblonga, intus submargaritacea. — Long. 40, diam. 7, alt. $2\frac{1}{2}$ mill. (Coll. Nr. 4.)

Daudebardia Novoseelandica Pfr. in Malak. Bl. VII. 1861. p. 146.
Habitat in Nova Seelandia (Hochstetter).

Species mihi incognita:

Daudebardia Letourneuxi Bourg. Moll. nouv., litig. ou peu connus. Fasc. 6. 7. ex Algeria. (Minus planulata et spira minus laterali, quam in speciebus europaeis; diam. $2\frac{1}{4}$, alt. $1\frac{1}{4}$ mill.: *Crosse* in Journ. Conch. XIV. 1866. p. 314.)

III. **Gaeotis** Shuttleworth.

« Testa sigaretiformis, tenuissima, hyalino-vitrea, intestina tantum includens, antice pallii replicatura breviter inclusa, postice in excavatione dorsi profunde immersa et semi-obtectata, subtus per diremptionem marginis gelatinoso-membranacei latissime excisa, quasi abscisse dimidiata, anfractuum omnium marginem columellarem liberum ostendens; spira brevissima, anfr. $2\frac{1}{2}$ — 3, ultimo maximo; apertura auriformis, maxima, peristomate simplice, tenui, margine basali et columellari membranaceo-marginato. »

«Animal magnum, depressum, pede latissime dilatato, complanato, pellucente; tentaculi 4, quorum 2 postici majores, remoti, 2 antici parvi; pallium ad latus dextrum postice sub spirae terminationem — ubi anus etiam situs est — appendiculatum; lamina lingualis fere ut in *Vitrina* et *Zonites* constituta videtur; papillae nempe numerosae in seriebus utrinque obliquis ordinatae sunt: papilla centrali obtuse tridentata, mediis vix a centrali diversis, lateralibus autem subulato-productis, arcuatis, basi? bifurcatis. An maxilla adsit haeret.» (Sh.)

Gaeotis novum genus Molluscorum terrestrium *Shuttleworth*
Diagn. neuer Moll. Nr. 6. p. 126. (Bern. Mittheil.
März 1854.)

Obs. «Medium tenet locum inter *Parmacellam* et *Vitrinam*, illi situ et functionibus testae, huic pallio, testae natura et habitu affinis. Species tres generis eximii detexit b. *Blauner*, noctu vel matutino per aquisitiones autumnii ad truncos et folia praesertim *Musarum* occurrentes. E formatione linguae animal videtur sine dubio *carnivorum*.» (Sh.)

Vitrinae nonnullae, e. g. *V. Ruivensis*, testae characteribus persimiles sunt. (P.)

Species.

1. *G. nigrolineata* Shuttleworth.

«Testa depressissima, tenuissima, hyalino-vitrina, subopalescens, nitida, lineis incrementi flexuosis striata aliisque spiralibus obsolete decussata; spira minuta, plana, vix papillaris; anfr. $2\frac{1}{2}$, rapidissime accrescentes, ultimus maximus, depressus; sutura marginata; apertura perobliqua; perist. margine dextro flexuoso-producto, basali late membranaceo-marginato. — Diam. maj. 42, min. 9, alt. circa $3\frac{1}{2}$ mill.» (Sh. — Coll. Nr. 4.)

Gaeotis nigrolineata Shuttl. l. c. p. 127.

Habitat «Sierra de Luquillo» insulae Portorico.

2. *G. flavolineata* Shuttleworth. †

«Testa depressa, tenuissima, hyalino-vitrina, nitida, subopalescens, lineis incrementi flexuosis striata aliisque spiralibus obsolete decussata; spira minutissima, plana; anfr. $2\frac{1}{2}$, rapidissime accrescentes, ultimus maximus, subinflatus, et obtuse subangulatus, antice depressus; sutura marginata, obsolete crenulato-crispata; apertura perobliqua; perist. margine dextro flexuoso, basali et columellari latissime membranaceo-marginato. — Diam. maj. 49, min. 44, alt. 6 mill.» (Sh.)

Gaeotis flavolineata Shuttl. l. c. p. 127.

Habitat «Sierra de Luquillo» et ad «Rio Blanco» insulae Portorico, rarissima.

3. *G. albopunctulata* Shuttleworth. †

« Testa solidiuscula, opalescente-albida, epidermide tenuissima induta, pellucens, lineis incrementi flexuosis plicatula, aliisque spiralibus crispatulis decussata et quasi obsolete ruguloso-malleata; spira minuta brevissime papillaris; anfr. $2\frac{2}{3}$, rapidissime accrescentes, convexiusculi, ultimus magnus, inflatus, bene rotundatus, antice descendens et depresso-deflexus; sutura marginata, subcrenulata; apertura perobliqua; perist. margine dextro antrorsum flexuoso-producto, basali et columellari membranaceo-marginato. — Diam. maj. 49, min. 44, alt. 8 mill. » (Sh.)

Gaeotis albopunctulata Shuttl. l. c. p. 128.

Habitat prope Humacao insulae Portorico, rara.

IV. *Vitrina* Draparnaud.

Pfr. Mon. Helic. IV. p. 788. — *Albers* Helic. ed. *Martens* p. 43: genus VI. Heliceorum (Vitrineorum) et *Helicarion* sectio prima Naninae p. 46 (serius in *Ostas. Zool.* II. p. 68. 182 tamquam genus adoptatus et descriptus). — *Stabile* in *Rev. et Mag. Zool.* 1859. p. 422 species europaeas in duas sectiones distribuit: A. *Semilimax* (*elongata*, *brevis*, *pyrenaica*, *dubia* A. Schm., *Charpentieri* Stab.); B. *Phenacolimax* (*major*, *Draparnaldi*, *pellucida*, *Musignani*, *annularis*). Conf. *Stabile* Moll. viv. Piém. 1864. p. 25. 117. — *Bielz* Faun. Siebenb. 1863. p. 32.

Conspectus specierum.

A. Europaeae	§. 1. Nr.	1 — 40.
B. Asiaticae.		
1. continentales	§. 2. —	41 — 30.
2. insulares	§. 3. —	31 — 58.
C. Africanæ.		
1. continentales	§. 4. —	59 — 71.
2. insulares	§. 5. —	72 — 80.
D. Australicæ	§. 6. —	81 — 99.
E. Americanæ	§. 7. —	100 — 103.
F. Patriæ incertæ	§. 8. —	104.

§. 4.

1. **pellucida** Müll. (Coll. Nr. 1.) A². 43. — *Bielz Faun. Siebenb.* p. 34. — *Helix pellucida* Müll., *domestica* Ström. — *Vitrina beryllina* C. Pfr., *Mülleri* et *Dillwynii* Jeffr. — Europa media. (Il. 492.)
2. **annularis** Stud. (Coll. Nr. 2.) A². 43. — *Helix imputa* Stud. 1789 in Coxe trav. Switzerl. III. p. 432 (absque descriptione). — *Vitrina subglobosa* Mich., *aemulans* Ad.? — Alpes Helvetiae et Galliae, Lusitania. (Il. 493.)
3. **Draparnaldi** Cuv. (Coll. Nr. 3.) *Helix Draparnaldi* Cuv., *diaphana* Poir., *elliptica* Brown. — *Vitrina pellucida* Drap., *diaphana* et *depressa* Jeffr. — *Vitr. major* C. Pfr., A². 43. — *Vitr. Audebardi* C. Pfr. — *Helicolimax major* Fér. — Gallia, Germania, Britannia. (Il. 493.)
4. **diaphana** Drap. (Coll. Nr. 4.) A². 43. — *Bielz Faun. Siebenb.* p. 34. Excludantur varietates. — *Helix limacina* Alt., *virescens* Stud., *palliat* Htm. — *Vitrina pellucida* Voith, *albina* Zgl., *vitrea* Gray. — Germania, Helvetia, Gallia. (Il. 494.)

5. **V. Charpentieri** Stabile.

« Testa depressa, planiuscula, infra tumidiuscula, tenuis, laevigata, pellucida, nitida, lutescenti-hyalina; spira brevissima, apice non, aut vix prominula. Anfractus $2\frac{1}{2}$ convexiusculi, celeriter crescentes, sutura vix impressa, filomarginata distincti; ultimus sat magnus, depressus, elongatulus, basi latiusculus subplanus; apertura transverse ovato-rotundata; peristoma simplex, subtilissime limbatum, marginibus approximatis; columellari subarcuato, anguste membranaceo-marginato; supero, in medio, repando. — Alt. anfr. ult. $2\frac{1}{2}$, long. 5—6, lat. $3\frac{5}{8}$ — $4\frac{4}{8}$ mill. » (St.—Coll. Nr. 5.)

Vitrina glucialis Forb.? Pfr. Mon. Het. II. p. 496.

— *nivalis* Charp. in sched.!

— *Charpentieri* Stabile in Rev. et Mag. Zool. 1859. p. 419.
t. 15. f. 1—5; Moll. Piém. p. 24.

Habitat in Alpibus Helvetiae et Pedemontanis.

6. **V. plicosa** Bielz. †

« Testa orbicularis, depresse-globosa, nitidiuscula, diaphana, viridula; anfractibus 3, sensim accrescentibus, irregulariter plicosis; apertura rotundata. — Alt. 1, long. et lat. $1\frac{1}{2}$ lin. » (B.)

Vitrina plicosa Bielz Faun. Siebenb. 1863. p. 33.

Habitat in Transylvania.

•

7. (5.) **pyrenaica** Pér. (Coll. Nr. 6.) A². 43. — *Helicolimax pyrenaica* Pér. — Mont. Pyrenaei. (Il. 495.)

8. (6.) **elongata** Drap. (Coll. Nr. 7.) *A*². 43. — *Bielz* Faun. Siebenb. p. 34. — *Helix Semilimax* Fér. pat. — *Testacella Germaniae* Oken. — *Vitrina semilimax* Moq. — Germania, Carinthia, Gallia. (II. 495.)
9. (7.) **brevis** Fér. (Coll. Nr. 8.) *A*². 43. — *Stabile* Prosp. moll. Lugan. p. 47. — *Helicolimax brevis* Fér. — *Vitrina elongata* β. Pfr. Mon. II. p. 495. — Germania, Tirolia, Carinthia. (IV. 790.)
10. (8.) **Musignani** Mandral. † — Sicilia. (IV. 496.)

§. 2.

11. **V. imperator** Gould. †

«T. magnifica, fragilis, ventricosa, epidermide rigida fuscescente induta, obsolete spiraliter striata; anfr. 3 †. Apertura ampla subcircularis, ad columellam vix incrassata. — Axis $\frac{3}{4}$, diam. $4\frac{1}{2}$ poll.» (G.)

Vitrina imperator Gould in Proc. Bost. Soc. VI. Febr. 1859. p. 422; Otia conch. p. 404.

— — *Mart. Ostas. Zool. II. p. 44* (Helicarion?)

Habitat Hongkong Chinae.

Obs. «Persimilis *H. Ampullae* Bens.»

•

12. (9.) **Flemingi** Pfr. — Conf. Archer in Proc. Zool. Soc. 1864. p. 69. — Scinde Indiae. (IV. 790.)
13. (10.) **Siamensis** Haines. (Coll. Nr. 9.*) *Helicarion Siamensis* Mart. Ostas. Zool. II. p. 68. — Siam. (IV. 790.)
14. (11.) **Gigas** Bens. — *A*². 44. — Bengalia. (II. 496.)
15. (12.) **cassida** Hutt. (Coll. Nr. 10.) *Helicarion cassida* Hutt. — Himalayah. (II. 497. III. 2.)
16. (13.) **praestans** Gould. — *A*². 44. — Tavoy Birmanorum. (II. 497.)

17. **V. planospira** Benson. †

«Testa suborbiculato-depressa, peripheria rotundato-ovata, tenui, laevigata, obsolete arcuato-striatula, translucente, polita, cornea; spira convexiuscula, superne planata, sutura canaliculato-marginata; anfractibus 3, celeriter accrescentibus, ultimo antice depresso, leviter descendente, ad peripheriam compresse rotundato, subtus convexiusculo; apertura valde obliqua, ovato-lunari, peristomate tenui, superne antrorsum arcuato, margine columellari valde arcuato. — Diam. maj. 44, min. 44, axis 5 mill.» (B.)

*) T. depresso-globosa, tenuis, levissime arcuato-striatula, sub epidermide nitida, olivaceo-fulva carnea; spira vix elevata; anfr. 3 rapide accrescentes, primi convexiusculi, ultimus depresso-inflatus; apertura per-obliqua, subquadrato-rotundata; perist. simplex, marginibus approximatis, columellari arcuato, superne subcalloso. — Diam. maj. 84, min. 24, alt. 49 mill. (Spec. collectionis e Camboja, Lao Mountains. Dedit Bernardi.)

Vitrina planospira Bens. in Ann. and Mag. N. H. 3d. ser. III.
Apr. 1859. p. 271. Nec Pfr.

Habitat ad Pankabari et in valle Rungun, *V. Salii* consors, raro
occurrens.

18. *V. auriformis* W. Blanford. †

«Testa perdepressa, irregulariter ovata, auriformis, tenuis-
sima, striata, polita, epidermide membranacea induta, viridula
vel fusco-lutescens, nucleo pallidiore. Spira planulata, sutura
leviter impressa. Anfractus $4\frac{1}{2}$. Apertura ovalis, totam su-
perficiem basalem occupans et intimum apicis monstrans; peri-
stoma membranaceum. — Long. 43, lat. 8, alt. $2\frac{1}{2}$ mill.»
(Bl. angl.)

Vitrina auriformis W. T. Blanford Contrib. to Ind. Malac. VI.
1866. p. 6.

Habitat in montibus Nilgiris Indiae meridionalis.

19. (14.) *monticola* Bens. (Coll. Nr. 11.) A². 44. — Bengalia, Hima-
layah. (II. 497.)

20. (25.) *Scutella* Bens. † — Mont. Khasia Indiae, Kaschmir.
(IV. 798.)

21. (15.) *Bensoni* Pfr. — A². 44. — India, Calcutta. (II. 497.)

22. (14.) *Birmanica* Phil. — Mergui Birmanorum. (II. 498.)

23. *V. Cochinchinensis* Morelet. †

«T. depresso-globosa, tenuissima, tenere striata et lineis
spiralibus nonnullis, vix impressis, superne notata, pellucida,
nitida, viridi-cornea; spira brevis, obtusa, vix prominula; sutura
anguste marginata; anfr. $3\frac{1}{2}$ celeriter crescentes, ultimus in-
flatus, depresso globosus, utrinque convexus, basi subrugulo-
sus; apertura perobliqua, ovato-rotundata; peristoma simplex,
tenue, margine columellari stricto. — Diam. maj. 23, min. 18,
alt. 12 mill.» (M.)

Vitrina Cochinchinensis Morel. in Journ. Conch. XIV. 1866. p. 62.

Habitat Dien-ba Cochinchinae.

24. (25.) *Sallus* Bens. † — Darjiling, Teria Ghat. (IV. 799.)

25. *V. raphiella* Martens. †

«Testa rimata, depresso globosa, tenuis, vix striatula,
valde nitida, pallide lutea; spira obtusa, depressa, sutura opace
alba; anfr. 3, ultimus convexus, prope aperturam intensius
lutescens et ad suturam anfractui praecedenti late adnatus;
apertura diagonalis, rotundata, ampla; peristoma rectum.

simplex, obtusiusculum, marginibus callo distincto junctis, columellari valde arcuato. — Diam. maj. $7\frac{1}{2}$, min. 6, alt. 5; apert. long. $4\frac{1}{2}$, lat. 4 mill.» (v. M.)

Helicarion raphiellus Mart. Ostas. Zool. II. p. 69. t. 12. f. 9.
Habitat in Siam.

26. *V. russeola* Morelet. †

«T. subperforata, globoso-depressa, tenuissima, pellucida, nitens, infra suturas radiatim striolata, corneo-fulva; spira convexiuscula; sutura submarginata; anfr. 3 celeriter crescentes, ultimus basi dilatatus: apertura valde obliqua, semi-ovalis, marginibus simplicibus, rectis. — Diam. maj. 7, min. 6, altit. $4\frac{1}{2}$ mill.» (M.)

Vitrina russeola Morel. in Journ. Conch. XIII. 1865. p. 225.
Habitat in Cochinchina.

27. *V. unguiculus* Morelet. †

«T. depressa, superne convexa, subtus aperta, tenuis, nitens, pallide cornea, sub lente striatula et sulcis distantibus ad verticem decussatula; spira parvula, lateralis; sutura marginata; anfr. 2 convexi, subtus angustissimi, usque ad verticem patentes, ultimus permagnus, basi membranaceus; apertura horizontalis, auriformis; perist. simplex, rectum. — Diam. maj. 9, min. 6, altit. 3 mill.» (M.)

Vitrina unguiculus Morel. in Journ. Conch. XIII. 1865. p. 225:
Habitat in Cochinchina.

55. *V. suturalis* Martens. †

« Testa subglobosa, striatula, nitidissima, luteo-viridula, ad suturam distinctius striata et zona opaca alba picta; spira brevis, convexa, obtusa; sutura profundiuscula, marginata; anfr. 4, ultimus rotundatus; apertura subdiagonalis, ampla, lunato-rotundata; margo columellaris subperpendicularis, basalis recedens, perarcuatus, margo superus antrosum rotundatus, ad suturam recedens. — a) Diam. maj. 45, min. 42, alt. 40; apert. long. 9, lat. $8\frac{1}{2}$ mill. — b) Diam. maj. 20, min. $15\frac{1}{2}$, alt. 42; apert. long. $44\frac{1}{2}$, lat. $40\frac{1}{2}$ mill. » (v. M.)

Helicarion suturalis Mart. Ostas. Zool. II. p. 483. t. 42. f. 2.
 t. 5. f. 9. a. b. c.

Habitat in insula Buru Moluccarum.

56. *V. lineolata* Martens. †

« Testa subdepressa, perforata, distincte striatula et lineis spiralibus subtilissimis sculpta, valde nitida, pallide lutea, infra pallidior, ad suturam zona angusta opaca lutea picta; spira brevis, convexa, conica; sutura sat profunda, radiatim plicatula; anfr. vix 4, ultimus rotundatus; apertura paulum obliqua, late lunata; margo columellaris subperpendicularis, solum ad insertionem breviter reflexus, margo basalis et externus nec antrosum convexi nec recedentes. — a) Diam. maj. 49,

min. $44\frac{1}{2}$, alt. 12; apert. long. et lat. 14 mill. — b) Diam. maj. 12, min. 9, alt. 8; apert. long. 7, lat. $6\frac{1}{2}$ mill.» (v. M.)

Helicarion lineolatus Mart. Ostas. Zool. II. p. 184. t. 12. f. 4.
Habitat Sumatra (b), Java (a).

57. **V. sericea Martens. †**

«Testa depresse-subglobosa, perforata, striatula, sericconitens, pallide griseofusca, ad suturam zona fusca, dein lutea picta; spira depressa, obtusissima; sutura plane superficialis, sculptura nulla insignita; anfr. $4\frac{1}{2}$, convexiusculi, ultimus rotundatus; apertura diagonalis, late lunata; margo columellaris subperpendicularis, reflexiusculus, basalis et externus non antrorsum convexi, nec recedentes. — Diam. maj. 14, min. 12, alt. 9; apert. long. 8, lat. $7\frac{1}{2}$ mill.» (v. M.)

Helicarion sericeus Mart. Ostas. Zool. II. p. 185. t. 12. f. 4.
Habitat in insula Timor.

58. **V. albella Martens. †**

«Testa depresse globosa, semiobtectate perforata, tenuis, nitida, leviter striatula, albida, zona suturali opace alba; spira convexa; anfr. 4 convexiusculi, sutura mediocriter profunda, ultimus rotundatus; apertura diagonalis, late lunata; peristoma rectum, obtusum, margine basali arcuato, columellari primum subverticali, ad insertionem breviter reflexo. — Diam. maj. 9, min. $7\frac{1}{2}$, alt. $6\frac{1}{2}$; apert. lat. 5, alt. $4\frac{1}{2}$ mill.» (v. M.)

Helix Wonosariensis Mouss. in coll.

Helicarion albellus Mart. Ostas. Zool. II. p. 186.

Habitat Wonosari in parte orientali insulae Javae.

Obs. «Similis *Helicarioni raphiello*, Siamensi, sed sutura non ut in illo ad anfractum praecedentem appressa est.»

79. **V. Bocagei** Paiva. †

«T. helicoidea, subhaliotidiformis, parvula, subinflato-depressa, succineo-pellucida, lutescenti-rubella, tenuis, membranacea, nitidissima, carinata; spira subcentralis, apice depressiuscula; sutura impressa; anfr. 3, penultimus turgidus, amplus, albus, ultimus distincte acute carinatus, carina exacte media, supra carinam transverse rugosus, rugis obliquis, completis, concentricis, infra carinam obsoletis, ad centrum evanescentibus; peristoma simplex, tenue, in angulum acutum medio productum. — Diam. 3—4, alt. 2½, axis 2 mill.» (De Paiva.)

Vitrina Bocagei Paiva in Journ. Conch. XIV. 1866. p. 340.
t. 41. f. 4.

Habitat rarissima ad montes insulae Maderae.

80. **V. dumeticola** Dohrn.

«Testa depressa, ovata, tenuissima, subtiliter striata, nitidissima, vitraceo-cornea; spira vix elevata; sutura impressa; anfr. 3 vix convexi, rapide accrescentes, ultimus rotundatus, basi paullulum convexior; apertura obliqua, ampla, lunato-rotundata, latior quam altior; perist. margo superior dilatatus, columellaris recedens, valde arcuatus; margo anfractuum internus conspicuus. — Diam. maj. 9, min. 6¾, alt. 5¾; apert. lat. 6½ mill.» (Coll. Nr. 39.)

Vitrina dumeticola Dohrn in Malak. Bl. XIII. 1866. p. 119.
t. 5. f. 4—4.

Habitat in insula Principis sinus Guineensis.

§. 6.

81. *V. planilabris* Cox. †

« Vit. testa auriformi, valde depressa, tenui, translucente, polita, epidermide olivaceo-viridi induta, leviter striata et (sub lente) lineolis paucis depressis spiralibus; spira pusilla, vix prominente, nucleo albido; anfractibus tribus, ultimo peramplo, planato, exterius convexo; apertura lunato-ovata, intus margaritacea, peristomate tenui, margine columellari pertenui, plano, extus carinato. — Diam. maj. 0,80, min. 0,50, alt. 0,26; apert. 0,55 + 0,42 unc. » (C.)

Vitrina planilabris Cox in Proc. Zool. Soc. 1865. p. 697;
Journ. Conch. XIV. 1866. p. 45.

Habitat in regione «New-South-Wales» dicta Australiae.

§. 49.

175. (139.) *solidula* Pfr. — Habitat? (III. 22.)

Species fossiles:

Succinea Bensoniana Forb., Pfr. Mon. IV. p. 848.

— *Maresi* Bourg. Paléont. Algér. 1862.

VII. Physella Pfr.

Animal vix notum.

Testa bullaeformis, spira minima, anfractu ultimo elongato, fere totam longitudinem formante; columella simplex, arcuata, non truncata; peristoma simplex, rectum.

Physella novum genus Heliceorum Pfr. in Malak. Bl. VIII. 1864. p. 70; XII. 1865. p. 207.

An Daudebardiae, an Succineae vel Oleacinae affine?

Species hucusque unica:

1. Ph. Berendti Pfr.

T. oblonga, solidula, laevissima, nitida, corneo-fulva; spira vix prominens, obtusa; anfr. $2\frac{1}{2}$, ultimus basi vix angustatus; columella recedens, tum antrorsum immediate in peristoma continuata; apertura vix obliqua, acuminato-ovalis, intus margaritacea. — Long. 6, diam. 3 mill. (Coll. Nr. 4.)

Physella Berendti Pfr. in Malak. Bl. VIII. 1864. p. 74. t. 1. f. 4 — 4.

Habitat Mirador, Veracruz reipublicae mexicanae (Dr. Berendt).

VIII. Helix Linn. (Emend. Drap.)

(ex parte, nempe sectiones: *Xanthomelon* Mart. p. 174, *Helicostyla* Fér. p. 175); *Pfeifferia* Gray, Alb. ed. Mart. p. 45: genus 7 Heliceorum Vitrineorum; *Nanina* Gray, Alb. ed. Mart. p. 45: genus 8 Vitrineorum (sect. *Helicarium* Fér. p. 46, *Medyla* Alb. p. 47, *Paryphanta* Alb. p. 48, *Microcystis* Beck p. 49, *Xesta* Alb. p. 50, *Hemiplecta* Alb. p. 52, *Oxytes* Pfr. p. 54, *Rhysota* Alb. p. 54, *Ariophanta* Desm. p. 54, *Acusta* Alb. p. 56, *Thapsia* Alb. p. 56, *Orobia* Alb. p. 57, *Thalassia* Alb. p. 59, *Trochomorpha* Alb. p. 60, *Discus* Alb. p. 61, *Rotula* Alb. p. 62, *Thysanota* Alb. p. 63, *Nigritella* Mart. p. 63, *Sophina* Bens. p. 64, *Orpiella* Gray p. 64); *Stenopus* Guild., Alb. ed. Mart. p. 64: genus 9 Vitrineorum; *Zonites* Montf., Alb. ed. Mart. p. 65: genus 10 Vitrineorum (sect.: *Aegopis* Fitz. p. 66, *Moreletia* Gray p. 67); *Hyalina* Gray, Alb. ed. Mart. p. 67: genus 11 Vitrineorum (sect.: *Hyalina* s. str. p. 68, *Mesomphix* Raf. p. 70, *Mörchia* Mart. p. 71, *Ammonoceras* Pfr. p. 72, *Edusa* Alb. p. 72, *Conulus* Moq. p. 73, *Gastrodonta* Alb. p. 74); *Macrocyclus* Beck, Alb. ed. Mart. p. 75: genus 12; *Sagda* Beck, Alb. ed. Mart. p. 76: genus 13; (sect.: *Sagda* s. str. p. 76, *Hyalosagda* Alb. p. 77, *Proserpinula* Alb. p. 77, *Odontosagda* Mart. p. 78); *Leucochroa* Beck, Alb. ed. Mart. p. 78: genus 14 Vitrineorum. Conf. Pfeiffer in Malak. Bl. XIV. 1867. p. 81—92.

Cl. Dohrn (Malak. Bl. 1861. p. 194) de editione Martensiana operis Albersiani scribens emendationes nonnullas systematicas indicavit et praecipue genus *Cochlostylam* (p. 204) sequente modo emendare conatus est. Excluduntur sectiones: *Xanthomelon*,

Phoenicobius, *Chrysallis* et *Prochilus* et admittuntur in genere (in cujus definitione forma testae minime respicitur) sectiones: *Axina*, *Corasia*, *Chloraea*, *Geotrochus* (ex parte), *Calocochlea*, *Helicostyla*, *Cochlodryas*, *Orthostylus*, *Eudoxus*, *Phengus*, *Canistrum*.

Cl. *Mörch* (Synopsis Moll. terr. et fluv. Daniae 1864. p. 12) species in Dania obvias, ad nostrum genus Helicem pertinentes, sic enumerat. Fam. 4: *Zonitidae*. Gen. 4: *Hyalinia* cum subgeneribus: *Vitrea*, *Petasia*. Gen. 5: *Zonitoides* *Lehm.* — Fam. 5. *Ataenidae*. Gen. 6: *Discus* *Fitz.* cum subgen.: *Delomphalus*, *Pyramidula*, *Acanthinula*. Gen. 7: *Vallonia*. — Fam. 6. *Leucozonae*. Gen. 8. *Hygromia* (subgen.: *Perforatella*, *Conulus*, *Monacha*, *Hygromia*). — Fam. 7. *Xerophilae*. Gen. 9. *Jacosta* *Gray* (subgen.: *Helicopsis*, *Jacosta*). Gen. 10. *Eulota* *Hartm.* — Fam. 8. *Arian-tidae*. Gen. 11. *Arianta* *Leach* c. subgen.: *Chilotrema*. — Fam. 9. *Pentataenidae*. Gen. 12. *Helicogena* *Risso* (subgen.: *Tachea*, *Pomatia*).

Cl. v. *Martens* 1866 et 1867 in opere de Molluscis terrestribus Asiae orientalis plura etiam emendavit. *Microcystis* (antea *Naninae* sect. 4) nunc est sectio *Hyalinae* (p. 17), *Acusta* (antea *Naninae* sect. 10) nunc sectio *Helicis* (p. 21, 45). Loco *Orobiae* *Alb.* (*Naninae* sect. 12) restituitur *Macrochlamys* *Bens.*, *Ad.* (p. 239.) — *Helicarion* (antea *Naninae* sect. prima) tamquam genus proprium adoptatur (p. 182), includens *Vitrinellam* *Gray* s. *Medyllam* *Alb.* — *Trochomorpha* (antea *Naninae* sect. 14) nunc est genus definitum (p. 245) complectens sectiones *Nigritellam* et *Videnam*. — *Patula* (antea *Helicis* sect. 5) etiam characteribus generibus designatur (p. 258). Sectiones ejus sunt: *Rhytida*, *Macrocyloides*, *Endodonta*. — Quoad genus *Cochlostylam* emendationes *Dohrnianae* pleraeque adoptantur (p. 96). Excluditur sectio *Xanthomelon* (ad *Helicem* reducta) et admittuntur inter *Cochlostylas* sectiones: *Callicochlias*, *Axina* et *Corasia*.

Conspectus specierum:

- I. Peristomate subinflexo §. 1. Nr. 1—5.
- II. Peristomate recto aut vix expansiusculo.

§. 4:

1. **Busbyi Gray.** (Coll. Nr. 4.) *Nanina Busbyi* (Paryphanta) Pfr., A². 48. — Nova Seelandia (in parte septentrionali insulae septentrionalis: Hochstetter.) (I. 409.)

2. **H. Hochstetteri Pfr.**

T. umbilicata, depressa, solidula, irregulariter rugata et lineis impressis confertis obliquis subgranulata, glutinoso-nitens, fulva, superne lineis crebris undulatis castaneis ornata; spira vix elevata, vertice subtili, obtuso; anfr. 5½ vix convexiusculi, ultimus depresso-rotundatus, peripheria subangulatus, subtus irregulariter foveatus, nitidior, fasciis latioribus castaneis taeniatus; umbilicus mediocris, obliquus, non pervius; apertura perobliqua, lunaris; perist. rectum, antice submembranaceum, marginibus callo albido junctis. — Diam. maj. 65, min. 56, alt. 28 mill. (Mus. Cuming.)

Helix Hochstetteri Pfr. in Malak. Bl. VIII. 1864. p. 446.

Habitat in Alpibus calcareis Novae Seelandiae (v. Hochstetter).

Obs. Structura testae evidenter affinis *H. Busbyi*, a qua differt forma depressa, anfractibus lentius accrescentibus, sculptura et colore, nec non umbilico.

•

3. (2.) **atramentaria Shuttl. †** — *Nanina atramentaria* (Paryphanta) A². 48. — Nova Hollandia. (III. 680.)
4. (3.) **urnula Pfr.** — *Nanina urnula* (Paryphanta) A². 48. — Nova Seelandia. (IV. 8.)
5. (4.) **Ophiria Pfr.** — *Vitrina heliciformis Pfr.* — *Nanina Ophiria* (Macrochlamys) Mart. Ostas. Zool. II. p. 245. (IV. 8.)

§. 2.

6. (5.) **Caffra Fér.** (Coll. Nr. 2.) *Helix caffra* (Aerope) A². 83. — *Aerope caffra Mörch* in Journ. Conch. XIII. 1865. p. 395. — Promont. bonae spei. (I. 40.)
7. (6.) **Ampulla Bens.** — *Helix Ampulla* (Panda) A². 449. — Mont. Nilgherries. (IV. 9.)
8. (7.) **micans Pfr.** (Coll. Nr. 3.) *Pfeifferia micans Gray*, A². 45. — *Mörch* in Journ. Conch. XIII. p. 385. — Ins. Philippin. (I. 24.)
9. (8.) **flammulata Quoy. †** — *Otesia flammulata H. et A. Adams* Gen. II. p. 642. — *Nanina flammulata (Medyla)* A². 47. — *Helicarion flammulatus Mart.* Ostas. Zool. II. p. 485. — Celebes. (I. 64.)
10. (9.) **tecta Soul. †** — *Nanina tecta (Medyla)* A². 47. — Cochinchina. (IV. 9.)

11. **H. levioula Benson. †**

« Testa angustissime perforata, globoso-depressa, tenui, oblique striatula, striis spiralibus obsoletis sub lente vix decussata, polita, subdiaphana luteo-cornea; spira convexiuscula, apice

vix elevatiusculo, obtuso, sutura impressa, marginata; anfractibus 3 celeriter accrescentibus, ultimo antice majori, subtus convexo-subconoideo, peripheria superne subangulato-rotundato; apertura obliqua, magna, rotundato-quadrato-lunari, peristomate acuto, superne antrorsum arcuato, margine columellari subverticali, superne breviter reflexo, umbilicum subtegente, basali leviter arcuato. — Diam. maj. 7, min. $5\frac{1}{4}$, axis $3\frac{1}{2}$ mill. Ap. 4 mill. longa, $4\frac{1}{2}$ lata. » (B.)

Helix levicula Bens. in Ann. and Mag. n. h. 3d. ser. III. (May 1859.) p. 394.

Habitat rare ad Phie-Thán Birmaniae.

Obs. Adspectus Vitrinae, sed perforata.

§. 3.

12. (10.) **Falconari Reeve.** (Coll. Nr. 4.) *Helix Falconari* (Panda) A². 449. — Nova Hollandia. — Conf. Dohrn in Malak. Bl. IX. 1862. p. 210. (I. 46.)

§. 4.

13. (11.) **Mac Murrayi Ad.** (Coll. Nr. 5.) *Helix Mac Murrayi* (Cysticopsis) A². 445. — Jamaica. (III. 28.)
 14. (12.) **dilatata Pfr.** (Coll. Nr. 6.) *Eurycratera* A². 447. — Haiti. (I. 23.)
 15. (13.) **tenuis Pfr.** — Habitat? (I. 24.)
 16. (14.) **tumida Pfr.** (Coll. Nr. 7.) *Cysticopsis* A². 444. — *H. tunica* Ad. — Jamaica. (I. 24.)
 17. (15.) **Buddiana Ad.** — *Cysticopsis* A². 444. — Jamaica. (III. 28.)
 18. (16.) **aperta Born.** (Coll. Nr. 8.) *Pomatia* A². 444. — *H. terrestris* Forsk., *naticoides* Drap. — *Pomatia terrestris* Mörch in Journ. Conch. XIII. p. 390. — Europa meridionalis, Algeria. (I. 25.)
 19. (17.) **tristis Pfr.** (Coll. Nr. 9.) *Pomatia* A². 444. — *H. ceratina* Shuttle. — *Pomatia tristis* Mörch in Journ. Conch. XIII. p. 390. — Corsica. (I. 25.)
 20. (18.) **versicolor Born.** (Coll. Nr. 10.) *Polymita* A². 446. — Pfr. in Malak. Bl. X. 1863. p. 498; Novit. conch. p. 238. Nr. 344. t. 61. f. 9—12. (varr.) — Cuba. (I. 26.)
 21. (19.) **picta Born.** (Coll. Nr. 11.) *Liochila* A². 447. — Pfr. in Malak. Bl. V. 1858. p. 477; VI. 1859. p. 89; XIII. 1866. p. 65; Novit. conch. p. 296. t. 72. f. 4. 5. 19. 20. — *H. venusta* Gmel. — Cuba. (I. 26.)
 22. (20.) **sulphurea Mör.** (Coll. Nr. 12.) *Liochila* A². 447. — Pfr. in Malak. Bl. X. 1863. p. 245; Novit. conch. p. 239. Nr. 342. t. 61. f. 13. 44. — Cuba. (III. 29.)
 23. (21.) **muscarum Lea.** (Coll. Nr. 13.) *Polymita* A². 446. — Pfr. in Malak. Bl. IX. 1862. p. 40; XIII. 1866. p. 57. — *H. globulosa* Fér., *carnicolor* Orb. — Cuba. (I. 27.)
 24. (22.) **Trotteriana Bens.** — Pella A². 84. — Africa merid. (III. 29.)
 25. (23.) **depicta Grat. †** — St. Thomas et New-Orleans (Grat.)?? (I. 27.)

26. (21.) **Mac Andrewiana Pfr.** (Coll. Nr. 14.) *Helix Mac Andrewiana* (Euparypha) A². 130. — *H. ustulata* Lowe. — Ins. Selvages. (III. 625.)
 27. (25.) **munda Ad.** — *Cysticopsis* A². 144. — Jamaica. (III. 30.)
 28. (26.) **tenerrima Ad.** (Coll. Nr. 15.) *Cysticopsis* A². 144. — Jamaica. (I. 28.)
 29. (27.) **columellata Ad.** — *Cysticopsis* A². 144. — Jamaica. (III. 30.)
 30. (28.) **Cubensis Pfr.** (Coll. Nr. 16.) *Polymita* A². 146. — *H. Lannieriana* Orb., *penicillata* Gould. — Cuba. (I. 28.)
 31. (29.) **comes Poey.** (Coll. Nr. 17.) Cuba. (IV. 41.)
 32. (30.) **furva Lowe.** (Coll. Nr. 18.) *Leptaxis* A². 139. — Madera. (I. 29.)
 33. (31.) **Natalensis Pfr.** (Coll. Nr. 19.) *Pella* A². 84. — Natal. (I. 29.)
 34. (32.) **Letranensis Pfr.** (Coll. Nr. 20.) Cuba. (IV. 42.)

§. 5.

35. (33.) **Bartlettiana Pfr.** (Coll. Nr. 21.) *Coryda* A². 136. — *Pfr.* in *Malak. Bl.* V. 1858. p. 177. — Cuba. (III. 31.)

36. **H. Brocheri Gutierrez.**

T. imperforata, oblongo-globosa, solida, striatula, opaca, albida, strigis magis minusve confertis fulvis nonnullisque nigricantibus et fasciis angustis nigris signata; spira alte elevata, vertice obtuso, albo; anfr. 5 convexiusculi, ultimus rotundatus, non descendens; apertura parum obliqua, rotundato-lunaris, intus rubella, submargaritacea; perist. rectum, margine columellari calloso, subverticaliter descendente. — Long. 24—22, diam. 44 mill. (Coll. Nr. 22.)

β. Major, strigis destituta, fascia 1 suturali reticulata, tum 2 latis fuscis et 1 basali nigricante, apertura intus alba.

Helix Brocheri Gut. mss. teste Gundl. in litt.

— — *Pfr.* Novit. conch. p. 237. Nr. 340. t. 61.
 f. 7. 8; *Malak. Bl.* XI. 1864. p. 124.

Habitat in parte extrema orientali insulae Cubae.

*

37. (34.) **Lindoni Pfr.** (Coll. Nr. 23.) *Coryda* A². 136. — *H. immersa* Gundl. in *Poey* Memor. II. p. 7; *Pfr.* in *Malak. Bl.* V. 1858. p. 44. — Cuba. (I. 29: *Lindoni*.)

38. **H. melanocephala Gundlach.**

T. imperforata, globoso-conica, levissime striatula, pallide lutea, fasciis 3 nigricantibus ornata; spira convexo-conica, vertice subtili, acutiusculo; anfr. 4½ convexiusculi, ultimus rotundatus, infra suturam rufo-radiatus, antice breviter deflexus; apertura diagonalis, rotundato-lunaris, intus albida, trifasciata;

perist. simplex, rectum, margine columellari declivi, dilatato, plano. — Diam. maj. 46, min. 43, alt. 42 mill. (Coll. Nr. 24.)

β. Fasciis viridibus et fascia suturali aurantiaca notata.

Helix melanocephala Gundl. msa.; Pfr. in Malak. Bl. VI. 1859. p. 88.

Habitat in parte orientali insulae Cubae; var. β. Cayo del Rey (Wright).

•

39. (25.) *Hitturata* Pfr. — Habitat? (Ill. 31.)

40. (22.) *Cotyledonis* Bens. — Pella A². 84. — Promont. bonae spei (Ill. 31.)

41. (37.) *Irradiata* Gould. — *Nanina irradiata* (Thalassia) A². 60. — Nova Hollandia. (l. 29.)

42. *H. mucosa* W. et F. Blanford. †

«T. imperforata, conoideo-globosa, tenuissima, pallide interdum subviride luteo-cornea, oblique striata; spira breviter conoidea, apice acutiuscula, sutura marginata. Anfr. 4—5 convexiusculi, rapide accrescentes, ultimus major, non descendens, subtus convexus, ad peripheriam subcompressus. Apertura magna, obliqua, late lunaris; perist. rectum, tenue, margine columellari brevissime appresso-reflexo, perforationem claudente. — Diam. maj. 9½, min. 8, alt. 6 mill. Ap. 5 mill. lata, 4 alta.» (Bl.)

Helix mucosa W. et F. Blansf. Contrib. to Ind. Malac. Nr. 2. 1864. p. 7. t. 1. f. 9. t. 2. f. 3.

Habitat haud raro in montibus Nilgiris, prope Pykara, ad Coondoor Ghat et ad Seegoor Ghat.

Obs. «Forma similis *H. honestae* Gould.»

43. *H. seposita* Benson. †

«Testa imperforata, conoideo-globulosa, tenui, obsolete oblique striatula, albida, epidermide cornea induta; spira brevi, conoidea, apice obtuso, sutura impressiuscula; anfractibus 3, superne vix convexiusculis, ultimo magno, ventricosso, pene totam testam efformante, periomphalo leviter excavato; apertura magna, obliqua, rotundato-lunari, peristomate tenui, recto, margine columellari arcuatim descendente, vix expansiusculo. — Diam. maj. 7, min. 5½, axis 5 mill.; apert. long. 4½, lat. 4 mill.» (B.)

Helix seposita Bens. in Ann. and Mag. N. H. 3d. ser. III. 1859. Apr. p. 267. (Malak. Bl. 1859. p. 49.)

Habitat prope Darjiling (H. Blanford).

Obs. «An forte *Vitrinae* species?»

44. *H. trochiscus* Pfr.

T. imperforata, conica, solidula, laevigata, nitidissima, pellucida, cornea; spira convexo-conica; sutura submarginata; anfr. $5\frac{1}{2}$ convexiusculi, ultimus rotundatus, non descendens; apertura subverticalis, lunaris; perist. simplex, rectum, marginibus remotis, columellari brevi, substricto, calloso-subincrassato. — Diam. maj. 5, min. $4\frac{1}{2}$, alt. $4\frac{1}{4}$ mill. (Mus. Cuming.)

Helix trochiscus Pfr. in Proc. Zool. Soc. 1861. p. 20; Malak. Bl. VII. 1861. p. 231.

Habitat in insulis Aroo.

45. *H. Phytostylus* Benson. †

«H. testa imperforata, turbinato-subglobosa, tenui, irregulariter oblique striatula, lineis minutissimis confertissimis spirilibus decussata, albida, opaca, strigis obliquis, angustis, luteofuscis, translucentibus, politis ornata, periomphalo, peristomate aperturaque intus colore eodem tinctis; spira convexa, conoidea, sutura impressa, apice obtuso; anfractibus 5 convexiusculis, ultimo rotundato, subtus convexo, periomphalo anguste excavato; apertura obliqua, rotundato-lunari; peristomate tenui, acuto; margine columellari bitorto, superne intrante, circulariter subexcavato, medio angulato-dentato, aetate calloso, aurantiaco. — Diam. maj. 16, min. 14, axis 12 mill.» (B.)

Helix Phytostylus Bens. in Ann. and Mag. n. h. (Jun. 1864.) 3d. ser. XIII. p. 492.

Habitat ad Colesberg et prope Riversdale Capitis bonae spei.

46. *H. Capsula* Benson. †

«H. testa imperforata, subconoideo-depressa, tenui, oblique striatula, sub lente minutissime obsolete decussata, translucida, polita, viridescens-cornea; spira convexiuscula, sutura impressa, submarginata, apice vix elevato, obtuso; anfractibus 4, rapide accrescentibus, convexiusculis, ultimo antice majore, subtus convexo, medio excavato, peripheria rotundata; apertura obliqua, orbiculato-lunata, intus margaritacea, peristomate acuto; margine columellari arcuato, superne vix incrassato. — Diam. maj. 13, min. 10, axis 6 mill.» (B.)

Helix Capsula Bens. in Ann. and Mag. n. h. (Jun. 1864.) 3d. ser. XIII. p. 492.

Habitat prope «Simon's Bay» Capitis bonae spei.

*

47. (ss.) *fulva* Drap. (Coll. Nr. 25.) *Hyalina fulva* (Conulus) A². 72.
— Bielz Faun. Siebenb. p. 42. — *H. trochiformis* Mont., *trochilus*

Flem., *nitidula* Alt., *Mandralisci* Biv. — *H. chersina* Binn. Terr. Moll. IV. p. 119. — *Zonites Mandralisci* (Conulus) Bourg. Malac. Alg. I. ? — *Hyalinia* (Petasia) *fulva* Mörch Moll. 48. *H. subfulva* Gassios. †

« Testa rimata, turbinato-globosa, conoidalis, cornea vel fusca, nitida, minutissime striatula; anfractus 6 convexi, gradatim accrescentes, ultimus basi convexiusculus, antice descendens, subcarinatus; apice nitidulo; apertura subrotunda, depressa; peristoma rectum, simplex, acutum; columella vix patula; sutura impressa. — Diam. maj. $5\frac{1}{4}$, min. $4\frac{1}{2}$, alt. $\frac{1}{4}$ mill. » (G.)

Zonites subfulvus Gass. in Journ. Conch. XIV. 1866. p. 49.

Habitat in insula Art Novae Caledoniae (Montrouzier).

Obs. Differt a *Z. fulvo* solum anfractibus magis turbinatis, sutura profundiore et apertura non depressa.

49. *H. pupula* Gould. †

« T. minuta, ovato-conica, levis, succinea, infra convexa, indentata; anfr. 6 + tabulatis, ad peripheriam obtuse angulatis. Apertura transversa, lunata; labro simplici, columella recta, reflexa. — Axis ad $\frac{1}{5}$ poll. » (G.)

Helix pupula Gould in Proc. Bost. Soc. VI. 1859. p. 423; Olla conch. p. 102.

Hyalina pupula (Conulus) Mart. Ostas. Zool. II. p. 17.

Habitat Hakodadi insulae Jesso.

•

50. (39.) **Fabricii** Beck. — *Hyalina Fabricii* (Conulus) A². 73. — *H. nitida* Fabr. — Grönlandia. (III. 32.)

599. **H. gracilis** Poey. †

« Differt ab *H. Boothiana* Pfr. colore albo subcorneo, non nitente, anfractibus magis depressis, apertura minus alta, umbilico apertiore. — Diam. (spec. anfr. 4) 3, alt. 4½ mill. » (P.)

Helix gracilis Poey Rept. fis. nat. Cuba 1863. Jun. p. 69.

Habitat in insula Cuba. Rara ad San Juan de Remedios et Bayamo.

600. **H. Montetaurina** Pfr.

T. umbilicata, conoidea, tenuis, striatula, pellucida, albido-hyalina; spira convexo-conoidea, vertice minuto; sutura subcanaliculata; anfr. 6½ angustissimi, convexi, ultimus non descendens. basi convexior; umbilicus angustus, profunde pervius; apertura subverticalis, transversa; perist. simplex, rectum, acutum, margine supero brevissimo, basali arcuato, ad umbilicum vix dilatato. — Diam. maj. 4⅔, min. 4½, alt. vix 3 mill. (Coll. Nr. 241.)

Helix Montelaurina Pfr. in Malak. Bl. VI. 1859. p. 94; VII. 1860. p. 18; VIII. t. 1. f. 17—20.

Habitat in parte orientali insulae Cubae: Monte Toro; nec non in insula Haiti.

601. *H. elatior* Weinland et Martens.

T. anguste umbilicata, convexo-turbinata, subruditer striatula, corneo-hyalina; spira elata, vertice obtusulo; anfr. $5\frac{1}{2}$ convexi, lente accrescentes, ultimus turgidulus, non descendens; apertura obliqua, regulariter lunaris; perist. simplex, rectum, marginibus distantibus, columellari ad insertionem vix dilatato. — Diam. maj. 5, min. $4\frac{1}{2}$, alt. 3 mill. (Coll. Nr. 242.)

Helix elatior Weinl. et Mart. mss. Pfr. in Malak. Bl. VIII. 1861. p. 72 adnot. t. 1. f. 13—16.

Habitat in insula Haiti (Weinland).

*

602. (426.) *omissa* Pfr. — Juan Fernandez. (IV. 71.)

603. *H. polypleuris* W. Blanford. †

«T. aperte umbilicata, trochiformis, solidula, alba (spec. viventium verosimiliter cornea), dense et oblique costulata. Spira conoidea, apice obtusiusculo, sutura impressa. Anfr. 6, convexi, lente accrescentes, ultimus non descendens, carina elevata filiformi cinctus, subtus convexus et subsinuose radiatim costulatus circa umbilicum profundum, pervium. Apertura obliqua, rotundato-lunaris, fere circularis; perist. tenue, marginibus distantibus, columellari leviter expanso. — Diam. maj. 4, min. $3\frac{3}{4}$, axis 3 mill.» (Bl. angl.)

Helix (sect.?) *polypleuris* W. Blanf. Contrib. to Ind. Malac. V. 1865. p. 12.

Habitat in montibus Arakanensibus.

604. *H. Minviollei* Philippi.

T. late umbilicata, pyramidata, tenuis, striis incrementi tenuissimis, confertissimis striisque radiantibus elevatis, lamellaeformibus, distantibus, perobliquis sculpta, cornea, rufo-radiata; spira convexiusculo-conica, vertice laevigato, acutiusculo; anfr. 7 rotundati, lente accrescentes, ultimus non descendens; umbilicus conicus, fere $\frac{1}{2}$ diametri occupans; apertura parvula, parum obliqua, lunato-circularis; perist. simplex, rectum, marginibus convergentibus, columellari vix patente. — Diam. maj. 4, alt. $2\frac{3}{4}$ mill. (Coll. Nr. 243.)

Helix Pazi Phil. in Malak. Bl. XIII. 1866. p. 39. Nec Poey,

Helix Minviellei «Phil.» Pfr. in Malak. Bl. XIV. 1867. p. 80.
Prope Valparaiso primus invenit ornat. Patricius Paz - Minvielle.

605. *H. impura* Pfr.

T. umbilicata, trochiformis, tenuiuscula, rugoso-costulata, sub tegumento impura cornea; spira regulariter turbinata, vertice obtusulo; sutura profunda; anfr. 5 modice convexi, ultimus non descendens, subdepressus, subtus costulato-striatus; umbilicus mediocris, pervius; apertura obliqua, lunato-rotundata; perist. simplex, rectum, marginibus approximatis, columellari subverticali, superne dilatato, patente. — Diam. maj. 4, min. $3\frac{3}{4}$, alt. 3 mill. (Coll. Nr. 244.)

Helix impura Pfr. in Malak. Bl. XIII. 1866. p. 79.

Habitat Mirador, Veracruz reipublicae mexicanae (Berendt).

§. 38 a.

(*Subcarinatae.*)

944. **H. Villandrei Gassies. †**

«Testa late umbilicata, subcarinata, discoidea, fortiter striata, superne planulata, inferne convexa, nitida, lutescente-brunnescens, superne et inferne radiato-castanea, maculis undulatis ornata; anfractus 5—6 planati, regulariter accrescentes, ultimus subdilatus; apertura mediana, rotundato-ovalis, intus nitida, luteo brunnescens; peristoma simplex; columella tenuis; sutura linearis, plicata; apice horizontalis, corneo-pallida. — Diam. maj. 25, min. 22, alt. 10 mill.» (G.)

Helix Villandrei Gass. in Journ. Conch. XIII. 1865. p. 210.

Habitat in Nova Caledonia.

Obs. «Species affinis *H. Raynali* Gass. (Vid. Nr. 943 a in Addend.)

945. **H. patruellis Adams et Angas. †**

«H. testa depresso-conoidali, late et profunde umbilicata, rufa, fascia pallida transversa prope suturas ornata; spira valde

depressa; anfractibus 5, convexiusculis, rugoso-granulosis, ad suturas corrugatis, anfractu ultimo ad peripheriam subangulato; apertura lunato-ovata, margine columellari subreflexo, umbilicum partim tegente. — Long. $5\frac{1}{2}$, lat. 40 lin.» (A.)

Helix (Hadra) patruelis Ad. et Ang. in Proc. Zool. Soc. 1863. p. 520.

Habitat Port Lincoln Australiae meridionalis.

946. *H. Atkinsoni* Theobald. †

«Testa depressa, infundibuliforme-umbilicata, lineis transversis rugose striata, lineisque spiralibus obscure leviter decussata, obtuse carinata, sordide albida (forsan in meliore specimine cornea) semitranslucente, sutura impressa. Anfract. 5 convexiusculis. Apertura obliqua. Perist. leviter incrassato, non reflexo. — Diam. 0,54, alt. 0,20 poll.» (Th.)

Helix Atkinsoni Theob. in Journ. Ac. Soc. Beng. 1859. XXVIII. Nr. 4. p. 305.

Habitat prope Maulmein. (Unicam testam inanem invenit Atkinson.)

947. *H. concinna* Lowe. †

«T. orbiculata arctispira convexiuscula obtuse angulato-carinata aperte et sat large perspectivo-umbilicata sericeo-nitidiuscula tota albo-cerina v. pallide subvirescens, subpellucens, supra obsolete crebricostulata, subtus nisi circa umbilicum magis laevigata; spira convexiuscula; anfractibus $7\frac{1}{2}$ convexiusculis lente crescentibus oblique transversim obsolete aequicostulatis, ult. subobsolete carinato, subtus circa umbilicum rotundato (nec angulato) distinctius costulato-striato, antice non descendente; umbilico mediocri sat magno ($\frac{1}{4}$ diam. maj.) patulo spirali profundo, lateribus spiraliter sulcatis, anfr. intus usque ad apicem perspicuis; apert. oblique lunata subdepressa latiore quam alta haud angulata; perist. simplici tenui recto acuto. — Diam. maj. 8, min. $7\frac{1}{4}$, alt. 4 mill.» (L.)

Helix concinna (Euromphala) Lowe in Ann. and Mag. n. h. 3d. ser. VII. (Febr. 1864) p. 405.

Habitat in insula Ferro (Wollaston).

948. *H. hyptleocyclus* Benson. †

«H. testa latissime umbilicata, orbiculato-planata, planorbiformi, depressa, fragili, oblique striatula, translucens, polita, olivaceo-cornea; spira concaviuscula, apice foveolato, suturis profundis; anfractibus $4\frac{1}{2}$, gradatim incrementibus, utrinque

convexis, ultimo convexiusculo, peripheria subcarinata; apertura valde obliqua, elliptico-lunata; peristomate tenui, acuto, marginibus conniventibus, callo tenui junctis. — Diam. maj. 6, min. 5, alt. $4\frac{1}{2}$ mill.» (B.)

Helix hyptiocyclos Bens. in Ann. and Mag. n. h. (Febr. 1863.)
3d. ser. XI. p. 89.

Habitat prope «Fort M'Donald» insulae Ceylon (Layard).

949. *H. subangulata* Adams et Angas. †

«H. testa orbiculato-conoidali, pertenui, pellucida, vitrea, pallide straminea, anguste umbilicata; anfractibus planis, tenuissime concentricè striatis, ultimo ad peripheriam subangulato; apertura perobliqua, lunato-ovali, latiore quam longa; labio acuto, breviter reflexo, umbilicum vix tegente. — Long. $\frac{1}{2}$, lat. 3 lin.» (A.)

Helix (Thalassia) subangulata Ad. et Ang. in Proc. Zool. Soc.
1863. p. 521.

Habitat in Australia meridionali.

950. *H. Baladensis* Sowerbie. †

«T. umbilicata, depressa, subdiscoidea, tenuissima, striatula, nitida, translucida, pallide straminea, fulvo lineolata, lineolis infra suturam dilatatis et radiatim dispositis, postea subito attenuatis, antice curvatis et perobliquissime descendentes, prope umbilicum evanidis; spira brevissima, vix emersa; anfr. $3\frac{1}{4}$ convexusculi, subrapide accrescentes, sutura impressa separati; ultimus non descendens, subcompressus, obtuse subcarinatus, circa umbilicum mediocrem subinfundibuliter concavus; apert. obliqua, subampla, subovali-rotundata; perist. simplex, rectum, marginibus distantibus, callo tenuissimo junctis, supero antrorsum subarcuato, columellari ad insertionem vix incrassato, circa perforationem breviter reflexo. — Diam. maj. 5, min. $4\frac{1}{3}$, alt. $2\frac{1}{3}$ mill.» (S.)

Helix taeniata Montrouz. in sched. Nec Webb et Berth. etc.

— *Baladensis* Souv. in Journ. Conch. XI. 1863. p. 276.
t. 12. f. 1.

Habitat Balade Novae Caledoniae.

951. *H. Browni* Benson. †

«H. testa anguste umbilicata, conoideo-depressa, tenui, superne et subtus prope carinam solum plicis albidis confertim oblique plicata, versus umbilicum laevigata, albido-cornea, strigis obliquis rufis superne subtusque oblique ornata; spira

conoidea, sutura impressa, apice obtusiusculo; anfractibus 5, convexiusculis, superioribus convexis, ultimo angulato, subcarinato, subtus subconvexo; apertura late securiformi-lunulata; peristomate tenui, acuto; margine columellari expansiusculo. — Diam. maj. 5, min. 4, axis 3 mill.» (B.)

Helix Browningii Bens. in Ann. and Mag. n. h. (Jun. 1864.)
3d. ser. XIII. p. 493.

Habitat prope «Cape Point» Promontorii Bonae Spei.

952. *H. nubigena* Lowe. †

«T. umbilicata^{*} depressa orbiculato-subdiscoidea subcarinata subpellucida tenuiuscula hispidula fusca atro (intus) plerumque punctulata vel maculata; spira convexo-depressa, anfr. 4 convexiusculis, sutura distincta impressa; umbilico majusculo cylindrico subspirali profundo; apert. oblique lunato-ovali; perist. simplici, tenui, acuto. — Diam. maj. 5, min. $4\frac{1}{2}$, alt. $2\frac{1}{2}$ mill. An adult?» (L.)

Helix nubigena (*Hispidella*) Lowe in Ann. and Mag. n. h. 3d. ser. VII. 1864. p. 105.

Habitat ad radices Cytisi nubigeni in excelsioribus Teneriffae (Wollaston).

Obs. Affinis *H. hispidae* et quodammodo similis *H. conspurcatae*.

953. *H. Opaoana* Gassios. †

«T. late umbilicata, depressa, obtuse carinata, oblique et concentrice striata, corneo-rufescens; apice nitido; sutura mediocri; anfr. 6 regulariter accrescentes, ultimus depressus; umbilicus latus, elevatus, valide carinatus; apertura obliqua, subdepressa, semiovata; peristoma simplex. — Diam. 5, alt. $2\frac{1}{2}$ mill.» (G.)

Helix Opaoana Gass. in Journ. Conch. XV. 1867. p. 64.

Habitat in insula Art et Balade Novae Caledoniae.

Obs. «Species superne *H. rusticulae*, subtus *H. Montrouzieri* et *H. Cabriti* similis.»

953a. *H. Arrouxi* Bourguignat. †

«Testa parvula, aperte umbilicata, depressa, sat fragili, subpellucida, tenuiter striatula, fulvo-castanea, ac undique fasciis albidis dispositis, sicut maculis in pelle serpentium, adornata; spira parum convexa; apice prominente, nitido, striatulo, nigrescente; anfractibus $5\frac{1}{2}$, convexiusculis, regulariter crescentibus, sutura impressa separatis; ultimo obscure subangulato, supra parum convexo, subtus valde convexo, antice non

descendente; apertura obliqua, lunato-oblonga; peristomate simplice, recto, acuto; margine columellari vix expansiusculo. — Alt. 3, diam. 6 mill. » (B.)

Helix Arrouxi Bourg. in Rev. et Mag. Zool. XV. 1863. p. 257.
Habitat prope Berytum Syriae.

Nr. 399.)

Helix benigna Pfr. in Proc. Zool. Soc. 1862. p. 269. t. 36.
f. 11. 12.

Habitat «Lao Mountains» Cambojæ (Mouhot).

987. *H. Hidalgoiana* Crosse. †

«T. late umbilicata, lenticularis, tenuiuscula, subtranslucida, striis obliquis, irregularibus, rude capillaceis, confertis, longitudinaliter impressa, pallide castaneo-cinnamomea; spira parum elevata, vertice obtuso; sutura marginata; anfr. 6 vix convexiusculi, lente accrescentes, embryonales ($4\frac{1}{2}$) laeves, albidi, ultimus acute carinatus, basi convexior, nitens, obsolete capillaceo-striatus; apertura parum obliqua, subrhombea, intus livide submargaritacea; peristoma simplex, luteo-albidum, marginibus callo tenuissimo junctis, columellari ad insertionem vix dilatato, basali leviter incrassato. — Diam. maj. 25, min. 23, alt. $9\frac{1}{2}$ mill.» (Cr.)

Helix Hidalgoiana Crosse in Journ. Conch. XII. 1864. p. 283;
XIV. 1866. p. 56. t. 1. f. 2.

Habitat in Oceania.

*

988. (702.) *vitriolidea* Pot. et Mich. † — Habitat? (I. 89.)
989. (703.) *horionophala* Pfr. — Archip. japonicus. (IV. 112.)
990. (704.) *Arcidbensis* Pfr. — Portorico. (IV. 113.)
991. (705.) *Minerva* Pfr. — Ins. Trinitatis. (III. 113.)
992. (706.) *entomostoma* Jacq. † — Hogoleu. (IV. 113.)
993. (707.) *xiphias* Pfr. — Ins. Admiralitatis. (IV. 114.)
994. (708.) *conomphala* Pfr. — Ins. Philippin. (III. 635.)
995. (709.) *Metcalfei* Pfr. (Coll. Nr. 400.) *H. solarioides* Reeve.
— *Nanina Metcalfei* (Discus) A². 62. — Ins. Philippin.
(I. 121.)
996. (710.) *Crouanii* Guill. † — *Nanina Crouanii* (Discus) A². 62.
— Hamoa, ins. Salomonis. (I. 121.)
997. (711.) *Navigatorum* Pfr. — Ins. Navigatorum. (IV. 114.)

998. *H. Shermani* Pfr.

T. umbilicata, lentiformis, carinata, solidula, oblique striata et sub lente subgranulata, rufo-fusca; spira conoideo-convexa, vertice minuto, subpapillari, pallido; sutura marginata; anfr. 7 lente accrescentes, planiusculi, ultimus non descendens, acute carinatus, subtus convexior; umbilicus latiusculus; apertura fere diagonalis, securiformis; perist. simplex, marginibus vix convergentibus, basali arcuato, ad insertionem non dilatato. — Diam. maj. 48, min. $46\frac{1}{2}$, alt. 8 mill. (Mus. Cuming.)

Helix Shermani Pfr. in Proc. Zool. Soc. 1865. p. 828. t. 46.
f. 5; Malak. Bl. XIII. 1866. p. 40.

Habitat in insula Formosa (Swinhoe).

Obs. Differt a simili *H. Navigatorum* anfractuum ratione, apertura parvula, etc.

*

999. (712.) **exclusa** Fér. (Coll. Nr. 404.) *Nanina exclusa* (Discus) A². 62. — Nova Guinea, Vanikoro. — Var.: *H. Vahine* Jacq. (I. 122.)

1000. (713.) **Zollingeri** Pfr. — *Nanina Zollingeri* (Discus) A². 62. — Java? (III. 113.)

1001. **H. Sanis Benson.** †

«*H. testa mediocriter umbilicata, conoideo-orbiculata, depressissima, lenticulari, oblique subarcuatim striatula, subgranulata, cornea; spira parum elevata, conoideo-depressa, apice obtusa, sutura impressiuscula, marginata; anfractibus 5½, subplanulatis, ultimo carina mediana acuta utrinque compressa munito, subtus convexiusculo; apertura obliqua, securiformi; peristomate recto, acuto; umbilico infundibuliformi.* — Diam. maj. 14, min. 10, axis 3½ mill.» (B.)

Helix Sanis Bens. in Ann. and Mag. n. h. 3d. ser. VII. Febr. 1864. p. 84.

Habitat ad Portum Blair Andamanicum.

*

1002. (714.) **semiconvexa** Pfr. — Ins. Salomonis. (IV. 115.)

1003. **H. Cantoriana Benson.** †

«*H. testa mediocriter umbilicata, tenui, depressa, orbiculato-conoidea, lenticulari, oblique subarcuato-striata, subtus laeviore, utrinque lineis distincte incisis remotiusculis spirilibus decussata, fusco-cornea, translucente, nitidula; spira parum elevata, depresso-conoidea, apice nucleato, obtuso, rubello, sutura impressa, submarginata; anfractibus 5½, convexiusculis, ultimo carina mediana obtusiuscula utrinque compressa munito, subtus convexo; apertura obliqua, subquadrato-lunari; peristomate tenui, acuto; umbilico infundibuliformi.* — Diam. maj. 10, min. 9, axis 3½ mill.» (B.)

Helix Cantoriana Bens. in Ann. and Mag. n. h. 3d. ser. VII. 1864. p. 85.

Habitat in insula Pulo Sung-Sung, prope Pulo Pinang (Dr. Cantor).

*

1004. (715.) **Papua** Less. (Coll. Nr. 402?) *Nanina papua* (Discus) A². 62. — Nova Guinea. (I. 122.)

1005. (716.) **planorbis** Less. (Coll. Nr. 403.) *Nanina planorbis* (Dis-

cus) *A*². 62. — *Trochomorpha planorbis* Wallace in Proc. Zool. Soc. 1865. p. 408: Macassar, Batchian, ins. Aru. — Videna. Mart. Ostas. Zool. II. p. 249. *) t. 43. f. 4. 7. et *Trochomorpha Javanica* Mart. in Monatsber. Berl. Ak. 1864. p. 267. — Sumatra, Java, Borneo, Celebes, Ternate, etc. (l. 422.)

1006. *H. appropinquata* Martens. †

«Testa latiuscule umbilicata, acute carinata, conoideo-lenticularis, striatula, supra et infra lineis spiralibus confertis subtilibus sculpta, corneo-flavescens, concolor; spira breviter conica; anfr. 5, paulum convexiusculi, ultimus antice non descendens; apertura diagonalis, securiformis; peristoma simplex, acutum, margine supero stricto, infero arcuato. — Diam. maj. 11, min. 9, alt. 5, apert. long. 5, lat. 4 mill.» (v. M.)

Trochomorpha appropinquata Mart. in Monatsber. Berl. Ak. 18 Apr. 1864. p. 267.

— *planorbis* var. *appropinquata* Mart. Ostas. Zool. II. p. 249. t. 43. f. 8.

Habitat in parte occidentali insulae Borneo.

1007. *H. Timorensis* Martens. †

«Testa perspective umbilicata, lenticularis, acute carinata, arcuatim distincte striata, lardeo-nitens, fulvocornea, concolor; spira parum emersa; anfr. 6, ultimus antice paululum descendens; apertura valde obliqua, securiformis; peristoma rectum, simplex, margine supero antrorsum convexo, basali leviter concavo, columellari subincrassato. — Diam. maj. $16\frac{1}{2}$, min. $14\frac{1}{2}$, alt. $5\frac{1}{2}$; apert. long. 6, lat. $4\frac{1}{2}$ mill.» (v. M.)

Trochomorpha Timorensis (Videna) Mart. Ostas. Zool. II. p. 248. t. 43. f. 6.

Habitat in insula Timor.

*) «Testa perspective umbilicata, conico-lenticularis, acute carinata, striatula, nitidula, tenuis, corneo-lutescens, carina albida, utrinque saepius fusco-limbata; spira breviter conica; anfr. 5— $5\frac{1}{2}$, vix convexiusculi, ultimus antice non aut vix deflexus; apertura diagonalis, rhombo-securiformis; peristoma rectum, simplex (?), margine supero stricto, basali arcuato.

A. appropinquata Mart. (vid. spec. seq.): supra et infra distincte spiratim striata.

B. Lessoni Mart.: infra subtilissime spiratim striata. (t. 43. f. 4.) Diam. maj. $14\frac{1}{2}$ —16, min. 12—14, alt. 5—6; apert. long. 6— $6\frac{1}{2}$, lat. 5 mill.

C. Javanica Mouss.: striis spiralibus haud conspicuis. (t. 43. f. 7.) Diam. maj. $12\frac{1}{2}$ — $15\frac{1}{2}$, min. 11— $13\frac{1}{2}$, alt. 4—6; apert. long. $5\frac{1}{2}$ —6, lat. 3—5 mill.» (v. M.)

1008. *H. Saigonensis* Crosse. †

« T. late umbilicata, sublenticularis, tenuis, oblique vix striatula, nitidula, cornea; spira convexo-depressiuscula, apice mediocriter obtusa; sutura marginata; anfr. 6 vix convexiusculi, lente accrescentes; embryonales $4\frac{1}{2}$ laeves, nitidi, ultimus non descendens, medio carina acuta munitus, basi convexiusculus, nitidus; umbilicus conicus, pervius, $\frac{1}{8}$ diametri subaequans; apertura diagonalis, subrhombeo-lunaris; perist. simplex, acutum, marginibus vix convergentibus. — Diam. maj. 44, min. $9\frac{1}{2}$, alt. 5 mill. » (Cr.)

Helix Saigonensis Crosse in Journ. Conch. XV. 1867. p. 208.
t. 6. f. 3.

Habitat in provincia Saigonensi et in insula Poulo-Condor dicta, Cochinchinae gallicae.

*

1009. (717.) *Cressida* Gould. (Coll. Nr. 404.) *Nanina Cressida* (Discus) A². 62. — Samoa, Tahiti. (I. 423.)
 1010. (718.) *acutimargo* Pfr. (Coll. Nr. 405.) *Nanina acutimargo* (Discus) A². 62. — Ins. Philippin. (I. 423.)
 1011. (719.) *radula* Pfr. (Coll. Nr. 406.) *Nanina radula* (Discus) A². 62. — Luzon. (I. 423.)
 1012. (720.) *strigilis* Pfr. (Coll. Nr. 407.) *Nanina strigilis* (Discus) A². 62. — Ins. Philippin. (I. 424.)
 1013. (721.) *Castra* Bens. † — Himalayah. (III. 635.)
 1014. (722.) *albocincta* Pfr. (Coll. Nr. 408.) *Nanina albocincta* (Discus) A². 62. — Ins. Philippin. (I. 424.)

1015. *H. Clarencensis* Cox. †

« H. testa modice umbilicata, lenticulari, depressa, carinata, tenuissima pallide succineo-cornea, superne sub epidermide irregulariter radiatim curvato-striata, nitente, inferne convexa, laevissima, nitidissima, vitrea; spira late conoidea, convexiuscula; anfractibus $5\frac{1}{2}$, planatis, ultimo obtuse carinato; apertura obliqua; margine externo angulato, inferiore arcuato, columellari basi breviter expanso umbilicum leviter obtegente. — Diam. maj. 0,48, min. 0,42, alt. 0,28 unc. » (C.)

Helix Clarencensis Cox in Proc. Zool. Soc. 1864. p. 595.

Habitat Clarence River Australiae (Macgillivray).

*

1016. (723.) *ptychodes* Pfr. — *Microphysa* A². 83. — Jamaica. (I. 424.)
 1017. (724.) *Cumberlandiana* Lea. — Bland in Ann. Lyc. N.-York VII. p. 423. — Patula A². 86. — Tennessee. (I. 425. III. 444.)
 1018. (725.) *mordax* Shuttl. † — Bland in Ann. Lyc. N.-York VII. p. 422. — Patula A². 86. — Carolina septentr. (III. 635.)

1019. *H. Gassiesi* Pfr.

T. umbilicata, discoidea, carinata, tenuis, arcuato-striata et lineis impressis obliquis sub lente decussatula, nitida, lutescens, flammis crebris castaneis fulgurata; spira immersa; anfr. 4 convexiusculi, rapide accrescentes, ultimus magnus, utrinque convexior, medio subacute carinatus; apertura obliqua, subtriangulari-lunaris; perist. simplex, acutum, marginibus conniventibus. — Diam. maj. $8\frac{1}{3}$, min. $7\frac{1}{3}$, alt. 3 mill. (Mus. Coming.)

Helix Gassiesi Pfr. in Proc. Zool. Soc. 1864. p. 24. (Malak. Bl. VII. p. 234.)

Habitat in insula Erromanga Novarum Hebridarum (Turner).

1020. *H. rusticula* Gassies. †

«T. late et profunde umbilicata, discoidea, lenticularis, carinata, fortiter et oblique lamelloso-striata, unicolor saturate rubiginea; anfr. 6 regulares, ultimus depressus; sutura profunda, in anfr. praecedente carinata; apertura inclinata, obliqua, triangularis; perist. simplex, acutum. — Alt. $3\frac{1}{2}$, diam. 8 mill.» (G. gall.)

Helix rusticula Gass. in Journ. Conch. VII. 1858. p. 369.

Habitat in insula Pinuum Novae Caledoniae (Magen).

•

1021. (728.) *rudiuscula* Pfr. — Habitat? (I. 125.)

1022. (727.) *engonata* Shuttl. (Coll. Nr. 409.) Patula A². 86. — Teneriffa. (III. 444.)

1023. (728.) *solaria* Menke. (Coll. Nr. 410.) Bielz Faun. Siebenb. p. 50. — Patula A². 86. — *H. perspectiva* Mlf., *Megerlei* Jan. — Europa media. (I. 125.)

1024. (729.) *semiplicata* Pfr. (Coll. Nr. 411.) Patula A². 86. — *H. Gueriniana* Lowe. — Madera. (III. 444.)

1025. *H. calathoides* Palva. †

«Testa latissime et perspective concavo-umbilicata, subtus excavata, rotundata, utrinque convexiuscula, arctispira, obsolete v. obtuse carinato-angulata, subsolidiuscula; supra grosse crebricostata, costis prominulis ad angulum abrupte desinentibus; subtus obsolete vix striatula, laevigata; spira convexiuscula, subconoideo-depressa, apice obtusa, laevigata; sutura distinctissima, valde impressa; anfr. 7—8, convexiusculis, lente crescentibus, ult. antice recto, haud deflexo, supra carinam obsoletam crebricostato, convexiusculo, subplanato, infra ecostato, laevigato, rotundato-convexo; umbil. latissimo, infundibuliformi, pervio, patulo, profundo; apertura oblique ovali, altiore quam lata;

peristomate simplici, recto, tenui, acuto. — Diam. maj. 7—8, min. $6\frac{1}{2}$ — $7\frac{1}{2}$, alt. 3—4 mill.» (Lowe).

Helix calathoides De Paiva mss. Lowe in Ann. and Mag. n. h. 3d. ser. XII. (Nov. 1863.) p. 338.

Legitur semifossilis in insula Deserta australi «Bugio» dicta.

1026. **H. Lizardensis Pfr.**

T. umbilicata, conoideo-lenticularis, solida, carinata, conferte costulato-striata et lira filiformi juxta carinam posita instructa, cerea; spira conoideo-convexa; sutura carinato-exserta; anfr. 8 planiusculi, lentissime accrescentes, ultimus basi convexiusculus, ruditer striatus; umbilicus mediocris, profundus, $\frac{1}{4}$ diametri vix aequans; apertura subverticalis, anguste angulato-lunaris; perist. simplex, rectum, margine basali leviter et regulariter arcuato. — Diam. maj. $7\frac{1}{2}$, min. $7\frac{1}{4}$, alt. 3 mill. (Coll. Nr. 442.)

Helix Lizardensis Pfr. in Proc. Zool. 1862. p. 269.

Habitat in insulis Lizardensibus Australiae (Macgillivray).

Obs. Affinis *H. clathratulae* Pfr., sed major, planior, umbilico multo minore, striis minus elevatis, carina peripherica acutiore, carina altera dense approximata.

*

1027. (730.) **clathratula** Pfr. (Coll. Nr. 443.) Bens. in Ann. and Mag. n. h. 3d. ser. V. (Apr. 1860) p. 247. — Patula A². 86. — *H. Puteolus* Bens. olim. — Ceylon. (III. 445.)

1028. (731.) **retexta** Shuttl. (Coll. Nr. 444.) Patula A². 86. — Ins. Palma. (III. 445. IV. 446.)

1029. **H. gyrina Gassies. †**

«T. late et profunde umbilicata, discoidea, lenticularis, carinata, oblique regulariter striata, brunnea, nitida; sutura sat profunda, ad anfractum praecedentem subcarinata; apertura rotundato-ovalis; perist. simplex, acutum. — Alt. 3, diam. 5 mill.» (G. gall.)

Helix gyrina Gass. in Journ. Conch. VII. 1858. p. 369

Habitat in insula Pinuum Novae Caledoniae (Magen).

1030. **H. fabrefacta Pease. †**

«H. t. lenticulari, solidiore, late et profunde umbilicata, acetabuliformi, albicante, cretacea, sordida, inaequaliter et irregulariter radiatim fusco-castaneo strigata vel maculata; apice elevato; spira concava; anfr. 7, juxta margines depressis seu sulcatis, ultimo acute carinato, deinde planulato, ad umbilicum

acute carinato; apertura rhomboidea; labro simplici, acuto.»
(P.) Dimens.?

Helix fabrefacta Pease in Proc. Zool. Soc. 1864. p. 669.

Habitat in insulis Oceani pacifici australis.

Obs. Conf. *H. feta* Pease in §. 54.

1031. *H. depressiformis* Pease. †

«*H. testa* discoidea, planorboidea, supra planulata, subius convexa, tenui, subpellucida, parum nitidula, fusco-cornea, late umbilicata, oblique confertim rugoso-striata; spira planulata, interdum parum elevata; anfr. $3\frac{1}{2}$, vix marginatis, ultimo acute carinato, ad marginem compresso, ad umbilicum rotundatum carinato. — Diam. 7, alt. 2 mill.» (P.)

Helix depressiformis Pease in Proc. Zool. Soc. 1864. p. 670.

Habitat in insulis Oceani pacifici centralis.

1032. *H. prostrata* Pease. †

«*H. tenui*, depressa, profunde umbilicata, viridescenti-cornea, striis confertis subtilissimis decussata; anfr. 4, planis, celeriter accrescentibus; ultimo latiore, acute angulato, supra prope marginem sulcato, antice dilatato, subius convexo; apice depresso; apertura late rotundato-lunari; perist. simplici, acuto. — Diam. 6, alt. $2\frac{1}{4}$ mill.» (P.)

Helix prostrata Pease in Proc. Zool. Soc. 1864. p. 670.

Habitat in insulis Oceani pacifici centralis.

*

1033. (m.) *Argonautula* WB. — Ins. Canar. (I. 125.)

1034. *H. pulverulenta* Lowe. †

«*T. orbiculato-depressa umbilicata carinata solidiuscula concinniter crebristriata* (nec granulata) cinerea fusco 4—2-fasciata fasciis saepe interruptis tessellatis, supra lentiginosa; carina acuta simplici (nec limbata nec serrulata) submedia, supra expressa subsulcata; spira convexiuscula, anfr. 5 convexiusculis, sutura simplici (non marginata) distincta antice praesertim impressa; umbil. parvo angusto, pariete subangulato abrupte declivi; apert. depressa oblique lunato-ovali; perist. simplici, recto, labris subapproximatis interruptis. — Diam. maj. $6-7\frac{1}{2}$, min. $5\frac{1}{2}-7$, alt. $4-4\frac{1}{2}$ mill.» (L.)

Helix argonautula Webb, Orb. Canar. t. 2. f. 13—15 (nec 16—18).

Helix pulverulenta (*Discula*) *Lowe* in Ann. and Mag. n. h. 3d. ser. VII. 1864. p. 107.

Habitat in insula Canaria majore.

*

1035. (733.) *Parlatoris* *Biv.* (Coll. Nr. 445.) Fruticicola A². 104. — Sicilia. (I. 126.)

1036. (734.) *alata* *Pfr.* — Ins. Sandwich. (IV. 116.)

1037. (735.) *Reinae* *Ben.* (Coll. Nr. 446.) Fruticicola A². 104. — Sicilia. (IV. 17.)

1038. (736.) *latens* *Lowe.* (Coll. Nr. 447.) Ochthephila A.² 118. — Madera. (III. 115.)

1039. (737.) *armillata* *Lowe.* (Coll. Nr. 448.) Xerophila A². 111. — *H. striata* *Lowe* olim, *Lowe* *Pot.* et *Mich.* — Madera. (III. 116.)

1040. (738.) *Bertholdiana* *Pfr.* — Ins. Promontorii Viridis. (III. 116.)

1041. *H. volutella* *Gassies.* †

«Testa parva, superne et subtus aequaliter concava, Planorbium instar regulariter involuta, anfractu ultimo valde elevato et anguloso marginem acutum formante; regulariter et subfortiter striata, luteo-cornea, maculis rubicundis notata; apex valde immersus, lucide flavus; anfr. $7\frac{1}{2}$ confertissimi, sensim accrescentes; sutura parum profunda; apertura angusta, fere incumbens in anfr. ultimo, utrinque in angulum acutum producta; perist. simplex, acutum. — Diam. $5\frac{1}{2}$, alt. $2\frac{1}{2}$ mill.» (G. gall.)

Helix volutella *Gass.* in Journ. Conch. VII. 1858. p. 70. (Malak. Bl. 1859. p. 9.)

Habitat in Nova Caledonia.

1042. *H. labilis* *Gould.* †

«T. parva, tenuis, nitida, succinea, depressa, lenticularis; ad peripheriam acuta; subtus convexa, polita, arcte umbilicata; anfr. 5 convexiusculis. Apertura transversa, anguste lunaris; columella verticalis. — Axis $\frac{1}{10}$, diam. $\frac{1}{8}$ poll.» (G.)

Helix labilis *Gould* in Proc. Bost. Soc. VI. p. 422; Otia conch. p. 104.

Hyalina labilis *Mart.* Ostas. Zool. II. p. 17.

Habitat Hakodadi insulae Jesso.

1043. *H. Murphyi* *Cox.* †

«Hel. testa aperte umbilicata, depressa, rubido-cornea paulo nitente, confertim oblique elevato-costulata et sub lente decussatim striatula; anfractibus 5, plano-convexiusculis, ultimo acute carinato; spira obtusa; apertura modice obliqua,

triangulati-ovata, peristomate simplici acuto. — Diam. maj. 0,18, min. 0,16, alt. 0,09 unc. » (C.)

Helix Murphyi Cox Catal. Austr. landsh. 1864. p. 37.

Habitat Wollongong Australiae (Masters).

§. 41.

1044. (739.) **oculus capri** MÜLL. (Coll. Nr. 419.) *Helix algira* Linn. Mus. teste Hanley Ips. Linn. Conch. p. 372. — *H. Lusitanica* Linn.?, *aegophthalmos* Gmel. — *Zonites algirus* (Aegopis) A². 66. — Mort. Et. Zonit. 1862. p. 17. — Mouss. Coq. Schläfli. II. p. 3. — Europa meridionalis, nec Algeria. (I. 126.)
1045. (740.) **verticillus** Fér. (Coll. Nr. 420.) *H. lapidicola* Mf. — *Zonites verticillus* (Aegopis) A². 66. — Austria. (I. 127.)
1046. (741.) **Albanica** Ziegl. (Coll. Nr. 421.) *Zonites albanicus* (Aegopis) A². 66. — Albania, Dalmatia. (I. 127.)
1047. (742.) **compressa** Ziegl. (Coll. Nr. 422.) *H. morlachica* Parr. — *Zonites compressus* (Aegopis) A². 66. — Fiume. (I. 128.)
1048. (743.) **acies** Partsch. (Coll. Nr. 423.) *H. acumen* Fér., *acutimargo* Zgl. — *Zonites acies* (Aegopis) A². 66. — Dalmatia. (I. 128.)
1049. (743a.) **cutellata** Thomas. † — Proc. Philad. Ac. IX. (Oct. 1857.) p. 185. — Binn. Terr. Moll. IV. p. 22. t. 76. f. 6. — California. (IV. 347.)
1050. (744.) **Carica** Roth. (Coll. Nr. 424?) Rossm. Ic. III. p. 84. t. 82. f. 899. — *Zonites caricus* (Aegopis) A². 66. — Caria. (I. 129. IV. 448.)
1051. (745.) **chlorotica** Pfr. — *Zonites chloroticus* (Aegopis) A². 66. — Smyrna. (Alb.) (III. 417.)
1052. (746.) **Smyrnensis** Roth. (Coll. Nr. 425.) Rossm. Ic. III. 17. p. 85. *) t. 82. f. 900. — *Zonites smyrnensis* (Aegopis) A². 66. — Smyrna. (I. 129.)
1053. (747.) **corax** Parr. (Coll. Nr. 426.) Pfr. Novit. conch. Fasc. XXVI. p. 323. Nr. 439. t. 78. f. 1—5. — *Zonites corax* (Aegopis) A². 66. — Mons Taurus. (IV. 449.)
1054. (748.) **Croatica** Partsch. (Coll. Nr. 427.) *Zonites croaticus* (Aegopis) A². 66. — Croatia. — Var. *transiens* Mouss. Coq. Schläfli. I. p. 39: Epirus. (I. 128.)
1055. (749.) **Carniolica** A. Schmidt. (Coll. Nr. 428.) *H. sexvoluta* Parr. — Carniolia. (IV. 449.)

Habitat in insulis «Ilheos de Nordeste» dictis, ad ins. Portosanto oram orientalem adjacentibus.

1603. **H. Barbozae Paiva. †**

«T. umbilicata, orbiculato-pyramidata, solida, supra livide lutescens, fusco variegata, albo crenulato-granulata, striata; spira elata, apice lutea, nitida; sutura impressa; umbilicus patulus, spiralis, profundus; anfr. 7— $7\frac{1}{2}$ regulariter accrescentes, convexi, ultimus subpulvinatus, tumidus, carinatus, antice profunde deflexus, basi lineis undatis, caeruleo-griseis et interdum fascia castanea vel caeruleo-grisea notatus; apert. rotundato-lunaris; peristoma intus albo-incrassatum, subreflexum, marginibus contiguis, callo denso, inaequali junctis. — Diam. maj. 44—43, min. 8—9, alt. 7—8 mill.» (De P.)

Helix Barbozae Paiva in Journ. Conch. XIV. 1866. p. 342. t. 44. f. 8.

Habitat in insula parva «Ilheo da Fonte d'Area» dicta, ad oram septentrionalem insulae Portosanto adjacente.

Obs. «Differt ab *H. Gomesiana* anfractibus supra striatis, minus granulatis et lineis basalibus flexuosis, caeruleo-griseis.»

1604. **H. helicinoides Mousson. †**

«Testa biconica, anguste umbilicata, carina grossiuscula cincta, leviter striata et pilis caducis obsita, tenuis, griseo-

cornea, unifasciata; spira brevis, obtusa; anfr. $4\frac{1}{2}$ —5, subplani, ultimus basi convexus, antice paulum deflexus; apertura diagonalis, quadrangulo-lunata; peristoma expansum, margine columellari subverticali, reflexo. — Diam. maj. 42,7, min. 40,8, alt. 8 mill.» (v. M.)

α . Peristomate tenui, brevius reflexo.

Helix helicinoides Mouss., Pfr. Mon. III. p. 462; IV. p. 487.

— — (Fruticicola) Mart. Ostas. Zool. II. p. 270.

β . Major, peristomate incrassato, umbilici partem tegente. — Diam. maj. 48, min. 45, alt. 40; apert. long. 40, alt. $8\frac{1}{2}$ mill. (v. M.)

Helix cryptopila Mousson in coll.

Habitat in insula Java, var. in insula Rakata (Zollinger).

1621. *H. torrefacta* Lowe. †

« T. orbiculato-depressa umbilicata subcarinata, spiraliter sublamellatis argute et aequaliter filo-cincta, transversimque subtilissime et creberrime arcte striolata, albida fusco tessellatum fasciato-picta v. lentiginoso-maculata; spira convexiuscula, sutura valde distincta impressa, anfr. $4\frac{1}{2}$ —5 convexis, ult. antice descendente; umbil. parvo subspirali; apert. depressa transverse ovali labris approximatis v. continuis; perist. tenui simplicissimo. — Diam. maj. $5\frac{1}{2}$ — $6\frac{1}{2}$, min. 5—6, alt. $3\frac{1}{4}$ —4 mill. » (L.)

Helix torrefacta (Actinella) Lowe in Ann. and Mag. n. h. 3d. ser. VII. (1864) p. 406.

Habitat in insula Lanzarota.

Obs. Proxime affinis *H. lentiginosae*.

*

1622. *tenuistriata* Binn. † — Pfr, Mon. Hel. I. p. 432. Conf. W. G. Binn. Terr. Moll. IV. p. 418. *)

*) « It is quite flat on the upper surface, rising a little towards the apex; the whorls, which are distinctly marked, are beautifully striated with delicate prominent curved lines, which are crowded towards the apex, and separated by a distinct interval on the outer whorl; they terminate on the edge of the carina, which is a little plaited by them, the base below being smooth. The aperture is narrow, and marked by an angle at the carina. The lip below the carina has a distinct, though narrow reflection. The umbilicus is moderate, conical, and rather deep, exhibiting about three volutions. » (W. G. Binn.)

Gut. — Variat statura. Speciminis maximi diam. maj. 44, min.
34, alt. 24 mill. — Guantánamo Cubae. (IV. 248.)

1883. (1411.) **Bayamensis** *Pfr.* (Coll. Nr. 904.) *Thelidomus* A². 144.
— *Pfr.* in Malak. Bl. V. 1858. p. 39; VI. 1859. p. 176. — St.
Jago de Cuba. (IV. 248.)

1884. *H. provisoria* *Pfr.*

T. imperforata, depresso-globosa, oblique subconferte pli-
catula, nitidula, lutea; spira conoidea, vertice minuto, obtuso;
anfr. 4 modice convexi, ultimus inflatus, antice perdeflexus,
basi laevior; apertura perobliqua, rotundato-lunaris, intus sub-
margaritaceo-albida; perist. incrassatum, album, marginibus sub-
conniventibus, dextro arcuato, vix expansiusculo, columellari
dilatato, plano, substricto vel leviter arcuato, non dentato. —
Diam. maj. 30, min. 24½, alt. 49 mill. (Spec. typica.) — Va-
riat magnitudine et epidermide interdum fusco irregulariter
radiatula. (Coll. Nr. 905.)

Helix provisoria *Pfr.* in Malak. Bl. V. 1858. p. 39; VI. 1859.
p. 85.

— *appendiculata* Gundl. in sched. 1859.

Habitat in parte meridionali insulae Cubae (Gundlach), nec non
New Providence insularum Bahamensium (Bland).

1885. *H. emarginata* Gundlach.

T. imperforata, depresso-globosa, solidula, oblique et con-
ferte plicata, lutea; spira breviter conoidea, obtusa; anfr. 4
modice convexi, ultimus subglobosus, basi laevior, antice subito
deflexus; apertura perobliqua, subtriangulari-lunaris; perist. in-
crassatum, marginibus callo junctis, dextro regulariter arcuato,
vix expanso, columellari dilatato, plano, adnato, ad insertionem
subemarginato, tum stricto et dente nodiformi vel transverse

elongato munito, cum dextro angulum indistinctum, subrectum formante. — Diam. maj. 20, min. 17, alt. 14 mill. (Coll. Nr. 906.)

Helix emarginata Gundl. mss.; Pfr. in Malak. Bl. VI. 1859. p. 86; IX. 1862. p. 9.

— — — Pfr. Novit. conch. p. 182. Nr. 283. t. 49. f. 4. 5.

Habitat prope Mayarí insulae Cubae.

2236. H. Greenhilli Cox. †

• Hel. testa umbilicata, globoso-turbinata, laevigata, obsolete striata, lineolis undulatis minutissimis confertis sub lente manifestis, rufo-castanea, subtus viridi-fulva; anfractibus sex, ultimo peramplo, convexo, caeteris convexiusculis; apertura lunato-subcirculari, peristomate tenui, modice reflexo, columella basi dilatata, umbilicum fere obtegente, labro intra albido, extra viridi-fulvo. — Diam. maj. 4,20, min. 4,00, alt. 0,90 unc. • (C.)

*) «T. profundissime umbilicata, orbiculato-convexa, subtenuis, confertim oblique plicatulo-striata, concentrice et laxe substriata, subtus magis distincte, pallido-fulva, fascia alba ad peripheriam utrinque rufo-marginata, et altera alba, lata, postice evanescente circa umbilicum ornata; spira convexa, apice obtusa; anfr. 4 convexi, rapide accrescentes; ultimus antice subito deflexus, ad peripheriam obtuse subangulatus, pone labrum subconstrictus; sutura impressa; apertura obliqua, transverse lunaris, rufo-marginata, margine fasciis albis interrupto, intus concolor, fasciis perlucetibus; peristoma acutum, reflexum, circa perforationem mediocriter apertam late reflexum et rufo-tinctum; area umbilicali antice rufa. — Diam. maj. 28, min. $24\frac{1}{2}$, alt. 20 mill. — Habitat? Mus. Burdigalense.» (Souv. l. c.)

Helix Greenhilli Cox in Proc. Zool. Soc. 1865. p. 696; Journ. Conch. XIV. p. 46.

Habitat Queensland Australiae.

2237. **H. Bocageana Crosse. †**

« T. anguste umbilicata, depresso-globosa, parum crassa, longitudinaliter rugoso-striata, spiraliter striis obsoletissimis decussatula, pellucida, sordide flavescens castaneo - unifasciata; spira apice obtusula; anfr. 6 convexiusculi, ultimus antice vix descendens, circa umbilicum mediocrem subdepressus; apertura transversim dilatata, lunaris; peristoma pallide fusco-violaceum, margine columellari superne fornicatim dilatato, umbilici partem obtegente, externo subattenuato; fauce alba, castaneo - unifasciata. — Diam. maj. $25\frac{1}{2}$, min. 22, alt. 19 mill. » (Cr.)

Helix Bocageana Crosse in Journ. Conch. XII. 1864. p. 284; XIV. 1866. p. 58. t. 1. f. 4.

Habitat in China?

2238. **H. deliciosa Pfr.**

T. umbilicata, depresse turbinato-globosa, tenuiuscula, subdistanter plicatulo-striata, parum nitens, isabellina, lineis rufis eleganter circumdata; spira conoidea, acutiuscula; anfr. fere 6 convexiusculi, ultimus non descendens, supra medium filoso-angulatus et fascia latiore rufa cinctus, basi convexus; umbilicus angustus, pervius; apertura fere verticalis, rotundato-lunaris; perist. pallide roseum, expansum, marginibus vix convergentibus, dextro medio subangulatim producto, columellari dilatato, fornicato. — Diam. maj. 26, min. 23, alt. $15\frac{1}{2}$ mill. (Mus. Cuming.)

Helix deliciosa Pfr. in Proc. Zool. Soc. 1862. p. 271. t. 36. f. 3. Habitat « Lao Mountains » Cambojae (Mouhot).

2239. **H. bacca Pfr.**

T. umbilicata, globoso-depressa, solida, levissime striatula, albo-lutescens, fasciis 3 castaneis, peripherica latiore, ornata; spira breviter turbinata, vertice subtili, carneo; anfr. $5\frac{1}{2}$ modice convexi, ultimus non descendens, basi subinflatus, striis spiralibus obsoletissimis sculptus, circa umbilicum angustissimum impressus; apertura parum obliqua, lunaris, intus alba, fasciis pellucetibus; perist. album, undique breviter reflexum, marginibus remotis, basali ad insertionem dilatato, subangulato. — Diam. maj. $23\frac{1}{2}$, min. $20\frac{1}{2}$, alt. 14 mill. (Mus. Cuming.)

Helix bacca Pfr. in Proc. Zool. Soc. 1865. p. 829. t. 46. f. 8;
Malak. Bl. 1866. p. 42.

Habitat in insula Formosa (Swinhoe).

•

2245. **H. Curtisiana** Pfr.

T. anguste umbilicata, conoideo-semiglobosa, solida, striata, castanea; spira conoideo-convexa, superne albida, vertice obtusulo; sutura albo-filosa; anfr. 6 lente accrescentes, ultimus magnus, convexus, supra medium subangulatus, basi planiusculus, antice descendens; apertura fere diagonalis, rotundato-lunaris; perist. vix incrassatum, anguste expansum, margine columellari superne triangulatim dilatato. — Diam. maj. 29, min. 25, alt. 17 mill. (Coll. Angas.)

Helix Curtisiana Pfr. in Proc. Zool. Soc. 1863. p. 528.

Habitat Port Curtis Australiae.

2246. **H. Cailleti** Crosse. †

« T. vix rimata, turbinato-globosa, crassiuscula, longitudinaliter ruguloso-striata, tenuissime subgranosa, saturate castaneo-brunnea; spira breviter conoidea, apice obtusula; anfr. 6 convexi, ultimus inflatus, obscure subangulatus, antice descendens, circa rimam umbilicalem subcompressus; apertura diagonalis, lunato-rotundata, intus livide violacea, submargaritacea; peristoma pallidius, violaceo-carneum, undique breviter expansum, reflexum, marginibus subconvergentibus, columellari superne dilatato, fornicatim reflexo. — Diam. maj. 32, min. 28, alt. 22 mill. » (Cr.)

β. « Pallidior, viridulo-lutea, minus crassa, peristomate al-bido; diam. maj. 28, min. 25, alt. 18 mill. »

Helix Cailleti Crosse in Journ. Conch. XII. 1864. p. 285; XIV. 1866. p. 59. t. 1. f. 5.

Habitat in Oceania.

2247. *H. Mabilloi* Crosse. †

«T. anguste umbilicata, turbinato-globosa, tenuiuscula, pel-
lucida, longitudinaliter rugoso-striata, pallide fusca; spira bre-
viter conoidea, apice obtusula; anfr. 5 convexi, ultimus inflatus,
subangulatus, antice descendens, subtus nitens, viridulo-flavus,
circa umbilicum mediocrem, pervium subcompressus; apertura
diagonalis, ampliter lunato-rotundata, intus livide margaritacea;
peristoma albidum, marginibus callo tenui, nitido junctis, supero
leviter dilatato, non reflexo, columellari parum obliquo, superne
dilatato, fornicatim reflexo, umbilici partem occultante. — Diam.
maj. 24, min. 21, alt. 16 mill.» (Cr.)

β. Minor, peristomate violacescente, umbilico vix partim
obtecto, brunneo circumdato. — Diam. maj. 20, min. 17, alt.
13 mill.

Helix Mabilloi Crosse in Journ. Conch. XII. 1864. p. 285;
XIV. 1866. p. 60. t. 1. f. 6.

Habitat in Oceania.

2252. *H. arctistria* Pfr.

T. umbilicata, conoideo-depressa, solidula, oblique con-
fertim costulato-striata, pallide fuscescens vel brunnea, fasciis
2 nigricantibus periphericis et fasciis numerosis epidermidis
albae signata; spira conoideo-elevata, vertice subtili; anfr. 4½
modice convexi, ultimus depresso-rotundatus, antice profunde
descendens; apertura perobliqua, lunato-ovalis; perist. carneo-
albidum, marginibus convergentibus, supero expanso, basali
reflexo, versus insertionem dilatato, umbilicum angustissimum
fere obtegente. — Diam. maj. 28, min. 23, alt. 14 — 15 mill.
(Coll. Nr. 1106.)

Helix arctistria Pfr. in Malak. Bl. XII. 1865. p. 118; Novit.
conch. Fasc. XXIII. p. 271. Nr. 383. t. 67.
f. 9. 10.

Habitat «Ensenada de Corrientes» insulae Cubae.

Obs. Differt ab affinibus (*Bonplandi* et *supertexta*) sculptura, an-
fractu ultimo depresso, apertura fere horizontali, etc.

*

2253. (1861.) *loxotropis* Pfr. (Coll. Nr. 4407.) *Planispira* A². 464. — *Mart. Ostas. Zool. II. p. 304.**) t. 46. f. 2. 3 cum varr. — *Planispira loxotropis* Wallace in Proc. Zool. Soc. 1865. p. 409. — Gilolo. (Ill. 226.)

2254. *H. Lorquini* Pfr.

T. anguste umbilicata, depressa, tenuis, minute striatula, nitidula, unicolor cerea; spira parum elevata, vertice subtili; anfr. 5 planiusculi, ultimus depressus, peripheria fere subangulatus, antice crista transversa magis minusve prominente munitus, pone aperturam constrictus, subtus convexiusculus; apertura perobliqua, subelliptica; perist. album, marginibus approximatis, dextro late expanso et revoluta, basali reflexo et prope insertionem intus leviter incrassato. — Diam. maj. 25—26, min. 20, alt. 40 mill. (Coll. Nr. 4408.)

Helix Lorquini Pfr. in Malak. Bl. XII. 1865. p. 422; Novit. conch. Fasc. XXIII. p. 273. Nr. 385. t. 67. f. 44. 45.

Habitat in insulis Moluccis (Lorquin).

Obs. Affinis praecedenti; differt testa tenui, spira humili, anfractibus planioribus et peristomate multo latius expanso. — Cl. v. *Martens* speciem tamquam *H. loxotropidis* var. *pressam* laudat, sed iconi ejus (t. 46. f. 2) minime respondet.

•

*) «Testa anguste et suboblecte perforata, depresso conoidea, subangulata, arcuatim striatula, opaca, virescenti-olivacea, fasciis fuscis infra magis distinctis et latioribus picta, infima umbilico approximata, regione suturali pallida; spira sat elevata, obtusa; anfr. 4½, convexiusculi, ultimus infra planatus, peripheria subangulatus, antice distincte descendens, oblique gibbosus, dein constrictus; apertura subhorizontalis, ovata, extrorsum distincte sursum flexa; peristoma subincrassatum, undique praeter insertionem marginis superi latiuscule reflexum, album, marginibus valde appropinquatis et callo tenui junctis, columellari inermi. — Diam. maj. 24—34, min. 18½—22½, alt. 43—49; apert. long. 45—46½, alt. 44—44 mill.

A. Bernateinii: major, sat conica, isabellino-flava, zona suturali alba, fascia peripherica modice lata et basali lata fusconigris.

B. laticlavia: media, olivacea, depresso conica, zona suturali alba, fasciis superis distinctis, sutura anfractus ultimi ad aperturam usque in interstitium fasciae penultimae et ultimae deflexa. (fig. 3b.)

C. angusticlavia: minor, sat conica, fuscovirescens, zona suturali albidula angusta, fasciis superis obsoletis vel nullis, sutura anfractus ultimi ad aperturam ad fasciam penultimam deflexa. (f. 3.)

D. lactecincta: minor, depresso conica, pallide virescentiflava, zona suturali alba latiuscula, fascia supera, peripherica et basali aequaliter latiusculis, intense castaneis.

E. pressa: mediocris, depressa, albidula, zona suturali alba angustissima, fasciis superis distinctis, sutura anfractus ultimi ad aperturam usque ad fasciam ultimam deflexa. (f. 2.) *H. Lorquini* Pfr.?» (v. M.)

2256. (1689.) **mucida Pfr.** — Percy's Island. (IV. 264.)

2257. **H. grossularia Pfr.**

T. angustissime umbilicata, turbinato-depressa, tenuiuscula, striis incrementi confertissimisque antrorsum descendentibus decussata, pallide isabellina, maculis corneis subfasciatim dispositis variegata; spira conoidea, vertice subtili; anfr. $4\frac{1}{2}$ modice convexi, ultimus subinflatus, obsolete carinatus, antice breviter descendens, rotundatus; apertura obliqua, sinuato-lunaris; perist. album, marginibus convergentibus, dextro anguste expanso, antrorsum flexuoso, basali reflexo, columellari superne fornicatim dilatato. — Diam. maj. 18, min. 16, alt. 12 mill. (Mus. Cuming.)

β. Testa albida, castaneo-trifasciata.

Helix grossularia Pfr. in Proc. Zool. Soc. 1861. p. 192; Novit. conch. p. 178. Nr. 279. t. 48. f. 5. 6.

Habitat in Nova Georgia (Macgillivray).

2258. **H. Peguensis Benson.** †

« Testa anguste umbilicata, globoso-depressa, solidiuscula, oblique rugoso-striatula, nitidiuscula, translucens, rufo-cornea, obscure unifasciata; spira conoidea, apice obtusa, sutura profundiuscula, rugose submarginata; anfractibus 5, vix convexis, lente accrescentibus, ultimo rotundato, supra peripheriam obtuse angulato, antice leviter descendente, circa umbilicum compressiusculo; apertura obliqua, rotundato-lunari; peristomate expansiusculo, livide albo-violaceo, marginibus remotis subconniventibus, columellari expanso, reflexiusculo, umbilicum leviter occultante. — Diam. maj. 20, min. 18, axis 13 mill. » (B.)

Helix Peguensis Bens. in Ann. and Mag. n. h. 3d. ser. VI. (Sept. 1860.) p. 192.

Habitat Pegu (Haughton).

2259. **H. Phayrei Theobald.** †

« T. modice umbilicata, orbiculato-conoidea, solidiuscula, alba, epidermide cornea, nitida; sub epidermide oblique, ruditer et flexuose plicato-striata, peripheria obtuse angulata. Spira depresso-conoidea, apice obtuso, sutura vix impressa. Anfr. 6, convexiusculi, lente accrescentes, ultimus versus aperturam descendens et rotundatus; subtus convexus, circa umbilicum apertum, profundum compressus. Apertura subcirculari-lunata, diagonalis; perist. album, undique leviter expansum, marginibus

approximatis, callo junctis. — Diam. maj. 48, min. $45\frac{1}{2}$, axis 8 mill. » (Bl. angl.)

Helix Phayrei Theob. in Journ. As. Soc. 1859. XXVIII. p. 306.

— — — *Blanf.* Contrib. to Ind. Malac. V. 1865. p. 26.
(Descriptio emend.)

Habitat Ava.

2260. *H. Pilidion* Benson. †

« Testa anguste umbilicata, subgloboso-conoidea, tenuissima, laevigata, leviter striatula, striis remotiusculis elevationibus corneo-fuscis, alteris confertissimis spiralibus decussantibus, translucente, albida, fascia unica peripherica rufa ornata; spira conoidea, apice obtusiusculo, sutura leviter impressa; anfractibus $4\frac{1}{2}$, sensim accrescentibus, convexiusculis, ultimo antice vix descendente, subtus convexo; apertura obliqua, quadrato-lunata, peristomate acuto, tenui, undique expansiusculo, marginibus remotis, subconniventibus, callo tenui junctis, columellari latiore, triangulato-expanso. — Diam. maj. 46, min. 13, axis 9 mill. » (B.)

Helix Pilidion Bens. in Ann. and Mag. n. h. 3d. ser. VI. (Sept. 1860.) p. 191.

Habitat in regione Peguensi.

2261. *H. hemiopta* Benson. †

« H. testa anguste umbilicata, depresso-conoidea, vix striatula, laeviuscula, minutissime granulata, opaca, albida; anfractu ultimo superne castaneo, versus peripheriam suturatiore; spira convexo-conoidea, apice obtuso, sutura vix impressa; anfractibus $4\frac{1}{2}$, convexiusculis, sensim accrescentibus, ultimo superne prope peripheriam obtuse angulatam concaviusculo, subtus convexiusculo; apertura obliqua, subquadrato-lunata, intus concolore, peristomate expansiusculo, superne antice arcuato, subtus breviter reflexo, marginibus remotis, columellari superne valde dilatato, umbilicum subtegente. — Diam. maj. 46, min. $43\frac{1}{2}$, axis 40 mill. » (B.)

Helix hemiopta Bens. in Ann. and Mag. n. h. 3d. ser. XI. (May 1863.) p. 348.

Habitat ad Portum Blair Andamanicum.

2262. *H. rufocincta* Newcomb. †

« H. testa depresso-globosa, cornea, rufo-unifasciata, umbilicata, sub lente decussato-striata; anfr. 6, ultimus non descendens; apertura subrotunda, labio reflexo, albo; sutura im-

pressa; columella non callosa. — Diam. maj. 0,70, min. 0,60, alt. 0,40 poll.» (N.)

Helix rufocincta Newc. in Proc. Calif. Ac. Mart. 1864. p. 116.
Habitat San Diego et insula Santa Catalina Californiae.

IX. Boysia Pfr. 1849.

Pfr. Mon. Helic. IV. p. 325. — *Hypostoma Albers* Helic. 1850. p. 130: genus Heliceorum. — *Hypotrema* (sectio 24 *Papae*) *Albers* Helic. ed. *Martens* p. 304. (Nomen mutatum ob *Hypostoma* genus Piscium.)

Species unica:

1. **Bensoni** Pfr. (Coll. Nr. 1.) *Anostoma Boysii* Bens. — *Hypostoma Boysii* Alb. — *Pupa Boysii* (*Hypotrema*) A². 305. — India orientalis. (I. 2.)

X. Plectostoma H. Adams.

«Testa conica, umbilicata; anfractus ultimus solutus, protractus, sursum flexus, inde retrorsum extensus; apertura simplex; peristoma subverticale, expansum.»

Plectostoma (novum genus Helicidarum) *H. Adams* in Ann. and Mag. n. h. 3d. ser. V. Mart. 1860.

«Differt a *Boysia* forma helicoidea et umbilico aperto, ab *Hypsostomate* apertura edentula, ab utroque genere anfractu ultimo soluto, constricto et retrorsum prolongato.»

1. *P. Crespignyi* H. Adams.

«*P. testa elevato-conica, tenuissima, pallido-fulva, laminis numerosis longitudinalibus tenuibus erectis munita, sutura valde impressa, apice subacuto; anfractibus 6, convexis, ultimo tubam protractam, postice paulum constrictam, sursum flectam, inde revertam efformante; umbilico aperto; apertura circulari, sub-verticali, paululum reclinante; peristomate libero, valde expanso, reflexiusculo. — Diam. maj. 2, min. $1\frac{1}{4}$, axis 2 mill.*» (Ad. — Coll. Nr. 4.)

Plectostoma De Crespignii H. Adams in Ann. and Mag. n. h. 3d. ser. V. Mart. 1860.

Habitat in insula Labuan, Borneo (De Crespigny).

XI. Hypselostoma Benson.

Pfr. Mon. Helic. IV. p. 325. — H. et A. Adams Gen. sh. II. (Pl. 35. 1858.) p. 640.

Species :

1. *tubiferum* Bens. (Coll. Nr. 4.) *Pfr. Novit. conch. p. 130. — Tanystoma tubiferum* Bens. — Birmania. (IV. 325.)

2. *H. Bensonianum* W. Blanford. †

«*T. mediocriter umbilicata, turbinata, non distincte striata, tenuis, cornea. Spira conica, apice papillari et versus axin obliquo, sutura profunda. Anfr. 4, superiores planulati, ultimus ad peripheriam carina prominente rotundata instructus, subtus convexus et versus umbilicum compressus, versus aperturam leviter ascendens; apertura circularis, fere verticalis, leviter sursum directa, libera, intus dentibus 5 lamellaribus munita, quorum 4 aequidistantibus et oppositis in angulis supero et infero orificii, quinto minore proxime super illum anguli superi marginis parietalis. Peristoma liberum, simplex, late expansum, tubaeforme. — Diam. maj. 3, min. $2\frac{1}{5}$, alt. 2, diam. perist. 4 mill.*» (Bl. angl.)

Hypselostoma Bensonianum W. T. Blunf. Contrib. to Ind. Malac. IV. 1863. p. 8.

Habitat Mya Leit Doung, Ava.

XII. Anostoma Fischer.

Pfr. Mon. Helic. IV. p. 326. — *Albers* Helic. ed. *Mart.* p. 154: sectio 63 Helicis. Conf. *Dohrn* in *Malak.* Bl. 1861. p. 202. — Omnes species notae brasilianae.

Conspectus specierum:

- A. Peristomate non perforato §. 1. Nr. 1—3.
B. Peristomate perforato §. 2. — 4—5.

§. 1.

1. **ringens** Linn. — *Helix ringens* Linn., (Anostoma) A². 154. (L. 1.)

3. **Verreauxianum** Hupé. (Coll. Nr. 1.) *Hupé* in *Casteln. expéd.* Moll. p. 22. t. 3. f. 5. — *Helix Verreauxiana* (Anostoma) A². 154. (IV. 326.)

§. 2.

4. **carinatum** Pfr. (Coll. Nr. 2.) *Helix carinata* (Anostoma) A². 154. (III. 650.)
5. **globulosum** Lam. (Coll. Nr. 3.) *Helix ringicula* Fér. (Anostoma) A². 154. (I. 2.)

XIII. Tomigerus Spix.

Pfr. Mon. Helic. IV. p. 327. — *Albers* Helic. ed. *Martens* p. 188: sectio 6 Bulimi. Conf. *Dohrn* in *Malak.* Bl. 1861. p. 203.

Species notae:

1. **gibberulus** Burr. — *Helix gibberula* Burr. — *Tomigerus principalis* Sow. — *Bulimus gibberulus* (Tomigerus) A². 188. — Pernambuco. (III. 284.)
2. **clausus** Spix. (Coll. Nr. 1.) *Helix clausa* Wagn., *tomigera* Moric. — *Anostoma Spixii* Beck. — *Bulimus clausus* Desh. (Tomigerus) A². 188. — Brasilia. (I. 2.)
3. **turbinatus** Pfr. (Coll. Nr. 2.) *Helix tomigeroides* Moric. — *Anostoma tomigera* Beck. — *Bulimus turbinatus* (Tomigerus) A². 188. — Brasilia. (I. 3.)
4. **Cumingi** Newo. — Para Brasiliae. (III. 285.)
5. **Venezuelensis** Pfr. (Coll. Nr. 3.) *Bulimus venezuelensis* (Tomigerus) A². 188. — Venezuela. (IV. 327.)

XIV. Streptaxis Gray.

Pfr. Mon. Helic. IV. p. 328. — *Albers* Helic. ed. *Martens* p. 305: genus XXXI Heliceorum (Pupaceorum). — *Dohrn* in *Malak. Bl.* XIII. 1866. p. 129: genus cum *Ennea* et *Streptostele* tribum *Streptocionidarum* constituens.

Conspectus specierum:

- A. Edentulae** (*Artemon*),
 a. subregulares §. 1. Nr. 1—10.
 b. genuinae §. 2. — 11—24.
B. Dente vel lamella 1 parietali, peristomate edentulo §. 3. — 25—45.
C. Pariete aperturali et peristomate armatis.
 a. Ovatae (*Odontartemon*) §. 4. — 46—64.
 b. Conoideae vel discoideae (*Discartemon*) §. 5. — 65—67.

§. 1.

1. (1.) **candidus** *Spix.* (Coll. Nr. 1.) *Helix perspectiva* *Wagn.*, *Spixiana* *Pfr.*, *candida* *Moric.* — *Streptaxis Spixianus* *A²*. 306. — *Brasilia*. (I. 404.)
2. (2.) **intermedius** *Alb.* — *A²*. 306. — *Brasilia*. (IV. 328.)
3. (3.) **Wagneri** *Pfr.* (Coll. Nr. 2.) *A²*. 306. — *Helix Wagneri* *Pfr.*, *Coffreana* *Moric.* — *Brasilia*. (I. 405.)
4. (4.) **Rollandi** *Bern.* † — *A²*. 306. — *Helix Rollandi* *Bern.* — *Brasilia?* (IV. 329.)
5. (5.) **subregularis** *Pfr.* — *A²*. 306. — *Habitat?* (I. 4.)

6. **Str. suturalis** *Martens.* †

« Testa perforata, globoso-conica, tenuis, alba; spira subregularis, turbinata, apice obtusa; anfr. $7\frac{1}{2}$, parum convexi, oblique costulato-striata, ultimus basi laevis, convexus, antrosum parum devians; sutura planulata, costulata; apertura obliqua, semiovalis; peristoma album, undique late reflexum, margine supero flexuoso. — Diam. maj. 28, min. 23, alt. 27 mill.» (v. M.)

Streptaxis suturalis *Mart.* in *Malak. Bl.* VI. 1859. p. 19; in *Alb. Helic.* p. 306.

Habitat in Nova Granada.

Obs. «Forma parum irregulari ad *Str. subregularem* et *alocum*, aperturae forma magis ad *Str. nobilem* accedit.»

7. (6.) **epistylum** Müll. † — *Helix epistylum* Müll. — Habitat?
(IV. 329.)
8. (7.) **conoidens** Pfr. — A². 306. — Malacca. (IV. 329.)
9. (8.) **alveus** Dunk. (Coll. Nr. 3.) A². 306. — Brasilia. (I. 4.)

10. **Str. Paivanus** Pfr.

T. angustissime aperte umbilicata, subregulariter convexo-conica, tenuiuscula, superne subtilissime striatula, nitida, pellucida, albido-hyalina; spira conoidea, vertice obtusulo; sutura profunda, filomarginata; anfr. $7\frac{1}{2}$ modice convexi, lente accrescentes, ultimus latere vix devians, antice non descendens, subtus convexus, laevigatus, striis nonnullis variciformibus notatus; apertura obliqua, lunaris, edentula; perist. album, breviter reflexum, marginibus remotis, basali antrorsum subflexuoso. — Diam. maj. $6\frac{1}{2}$, min. 6, alt. vix 5 mill. (Coll. Nr. 4.)

Streptaxis Paivana Pfr. in Journ. Conch. XV. 1867. p. 43.
t. 1. f. 2.

Habitat in Brasilia.

§. 2.

11. (9.) **nobilis** Gray. (Coll. Nr. 5.) A². 306. — *Str. Blandingiana* Pfr. Mon. I. p. 4. — *Str. Monrovia* Dohrn in Malak. Bl. XIII. 1866. p. 137. — *Helix pagoda* Fér.?, *Blandingiana* Lea. — Jun.: *Helix Monrovia* Rang, Pfr. Mon. Helic. — Sierra Leone. (I. 4.)
12. (10.) **rimatus** Pfr. — A². 306. — Habitat? (I. 5.)
13. (11.) **Dunkeri** Pfr. (Coll. Nr. 6.) A². 306. — Mart. Ostas. Zool. II. p. 7. — Brasilia. (I. 5.)
14. (12.) **Funcki** Pfr. (Coll. Nr. 7.) A². 306. — Martens in Malak. Bl. VI. 1859. p. 64. — Nova Granada. (I. 436.)

16. (14.) **Recluzianus** Pet. — A². 307. — *Helix Reclusiana* Petit. — Guinea. (I. 6.)
17. (15.) **uberiformis** Pfr. — Brasilia. (III. 287.)
18. (16.) **deplanatus** Pfr. — A². 307. — Habitat? (I. 6.)
19. (17.) **prostratus** Gould. (Coll. Nr. 9.) Gould in Proc. Bost. Soc. VI. 1856. p. 12; Otia conch. p. 220.* — A². 307. — Promontorium Palmarum. (IV. 330.)
20. (18.) **albidus** Pfr. — A². 307. — Habitat? (I. 6.)
21. (19.) **gibbosus** Pfr. — Nova Granada. (IV. 330.)

*) «T. pupoidea, valde distorta, tenuis, dilute cornea; anfr. 6, posticis lateraliter appositis, ad peripheriam acute angulatis, antico subtus glabrato; apertura longior quam lata, lamina palatali instructa; peristomate reflexo; umbilico crescentico, satis magno. — Long. $\frac{3}{8}$, lat. $\frac{1}{4}$ poll.» (G.)

22. **Str. Kirkii Dohrn.** †

« Testa perforata, depresso - piriformis, tenuis, subtiliter oblique striata, epidermide cereo - albida induta; spira obtuse conoidea, lateralis; sutura impressa, submarginata; anfr. 6, convexiusculi, superi regulares, 2 ultimi lateraliter valde deviantes, penultimus latere aperturæ deplanatus; apertura subverticalis, lunaris, edentula; peristomium simplex, mediocriter expansum, margine columellari reflexo. — Diam. maj. $\frac{5}{16}$, min. $\frac{3}{16}$, alt. $\frac{3}{16}$, apert. diam. $\frac{1}{8}$ poll. » (D.)

Streptaxis Kirkii Dohrn in Proc. Zool. Soc. 1865. p. 232.

Habitat in insula lacus Nyassae Africae tropicae (Kirk).

•

23. (20.) **Candeannus Pet.** (Coll. Nr. 10.) A². 307. — *Helix Candeana* Pet., *deformis* Desh. — Nova Granada. (l. 7.)

24. **Str. Deshayesianus Crosse.** †

« T. anguste umbilicata, turbinata, striis regularibus longitudinaliter impressa, parum nitens, corneo - albida; anfr. $6\frac{1}{2}$ vix convexi, ultimus devians, basi planulatus, subtus nitidulus, inconspicue striatus; apertura obliqua, edentula, ovato - lunaris; perist. album, marginibus reflexis, columellari et basali dilatatis, supéro subflexuoso, attenuato. — Diam. maj. 5, min. 4, alt. 4 mill. » (Cr.)

Streptaxis Deshayesianus Crosse in Journ. Conch. XI. 1863. p. 388; XV. 1867. p. 202. t. 5. f. 3.

Habitat . . . ?

§. 3.

25. (21.) **ovatus Pfr.** — A². 307. — Habitat? (l. 7.)

26. (22.) **deflexus Soul.** † — *Helix deflexa* Soul. — Cochinchina. (IV. 334.)

27. **Str. pellucens Pfr.**

T. umbilicata, oblongo - ovata, tenuis, superne arcuatim costulato-striata, nitida, hyalina; spira elevata, apice subacute conoideo; sutura impressa, submarginata; anfr. $6\frac{1}{2}$ convexiusculi, 4 primi regulares, ultimi deorsum leviter deviantes, ultimus omnino laevigatus, juxta aperturam subplanatus, antice leviter ascendens; umbilicus punctiformis, extus parum dilatatus; apertura parum obliqua, truncato-oblonga, lamella parietali libera, compressa, intrante coarctata; perist. subincrassatum, reflexiusculum, marginibus subparallelis, dextro ad insertionem tenui, tum leviter antrorsum dilatato. — Diam. maj. 13, min. 8, alt. $7\frac{1}{2}$ mill. (Coll. Nr. 14.)

Streptaxis pellucens Pfr. in Proc. Zool. Soc. 1862. p. 273.
t. 36. f. 6.

Habitat «Lao Mountains» Cambojae (Mouhot).

28. *Str. porrectus* Pfr.

T. umbilicata, oblique ovato-oblonga, tenuis, superne arcuato-plicatula, cereo-hyalina; spira excentrica, breviter conoidea; sutura impressa; anfr. $6\frac{1}{2}$ convexiusculi, primi 4 regulares, reliqui late deviantes, ultimus subascendens, ad suturam modo plicatulus; umbilicus mediocris, non pervius; apertura obliqua, truncato-oblonga, lamella parietali compressa, prope marginem dextrum intrante coarctata; perist. callosum, expansum et reflexum, margine dextro ad insertionem tenui, sinuato, tum subangulatim porrecto. — Diam. maj. 40, min. $7\frac{1}{2}$, alt. 6 mill. (Mus. Cuming.)

Streptaxis porrecta Pfr. in Proc. Zool. Soc. 1862. p. 273.
Habitat «Lao Mountains» Cambojae (Mouhot).
